that there are not in fact less than two-thirds of that number

It is claimed that Seattle now has a population of 20 000. This is probably excessive, but not largely so. In my judgment, based upon increasitie reports, recent increase in newspaper circulation and the large number of new houses, all occupied, there are not

of new houses, all occupied, there are not less than 18 000 people in the city—this esti-mate not including the transient population, which fill appears A start sure to the east about a mile and a quarter from the Center, with a few hun dred feet of progress brings one into a sightly and pictures que quarter which in slang local phrase known as 'Queen Anne Town' The whole neighborhood is or is being built up, nearly every house in the father. which fills every hotel in the city to over

THE LAKES

BEAUTIFUL HODIES OF WATER OF CREAT PRES-

To comprehend the attaction of Seattle the reader should know something of the takes (Union and Washington) already menhaned and I shall give some account of these before proceedings to a discussion of processings.

proceeding to a discussion of resources
Lake Union has directly to the west of Se-Like Union hes directly to the west of Seattle and is about one mile and a quarter in length (east and west) by half a mile wide it is separated from Elliott bay (the Beattle harbor) by a high ridge and a distance of one mile directly through the heart of the city From its northern side the lake is separated from Samon bay, an inter of the sound north of Seattle, by a distance of one mile. At this of benttle, by a distance of one mile At this point there is no ridge and between the lake and the bay there is a ditch or channel by which the former discharges its surplus water bmall bonts (skills and the like) are often put through this narrow channel

the drifting of logs through it is a regular and profitable business.

West of Lake Union and separated from it by less than half a mile is

LAKE WASHINGTON

A noble body of water from three to six miles wide and about thirty miles long. It lies parallel with the sound (north and south) and about two miles to the westward from it and discharges into the Duwamiah river, a navigable stream which fails into Elliott bay two or three miles south of Seattle Both of these lakes are deep and the connection between them is a little isthmus of soft soil about one-third of a mile in width. This has been perced by a narrow canal through which small boars and saw-logs are easily navigated. The surface of lake Union is about fifteen feet above high tide in the sound, and the surface of Lake Washington is a few feet higher. The flow of water through the channels mentioned is regulated by gate" so that up to the present time there has been no disturbance of the

natural levels
It will be seen that Lake Washington gives

BACK DOOR WATER FRONT To make a ship canal from the Sound to Lake Union and thence to Lale Washing ton is an entirely practicable scheme, and it would in fact cost but little money cuts required are short and easy and the forces of the water of the lakes could be so applied as to do the bigger part of the work buch a connection would make for Scattle an inland harbor where vessels could go in a few nunutes time and enjoy all the advant ages of a portwith anchorage. It would also parallel and double the water front of the cuty. Ass in from those prospective advant

of rail are already down and the work of construction in proceeding at the rate of 1000 feet per week. The road is like all cable roads, a double track, but one track is laid in leading to the rail of the road is like all cable roads, a double track, but one track is laid in ages, Like Washington is an IMMENSE PRESENT BENEFIT Jackson street while the other is in Mill street three blocks north This road is de-To Seattle It extends about fifteen miles north and fifteen south of the city and has signed not only for the usual purpose of street cur service but to form a through line a shore line of nearly one hundred miles. There are almost innumerable fertile bot from the Sound to Lake Washington Steamioms upon which settlement has long been established. It is in short a well populated ers will connect with the car line at its point of terminus on the lake and give the and furly well developed agricultural dis-trict. The lake, which is practically free from currents, affords easy access to the city and there is rarely a time when boats. whole of the lake country a cort of back-The view from the eastern end of Jackson may not be seen speeding through its green street is one of the fluest in the Puget sound country and, for that matter, one of the finest anywhere The lake itself is visible waters Two small stemboats ply the lake regularly and do a profitable traffic It is intended by the promoters of the Jackson street cable road to put several boats on the for about twenty infles north and south,

gurate the

Of I ake Washington would be impossible As the visitor looks south north, east or west, each view seems the climax of the sublime The glorious peaks of Rainier and Baller the shining Cascade rungs the som bre and picturesque forests—but it is waste of words to talk of things which cannot be conceived without being seen A few rules east of Lake Washington is Squak lake a fine deep body of water sur

rounded by a fortile country. This lake is connected with Lake Washington by a chin nel which would be navigable if it were cleared of drifts and other obstructions

PUBLIC INSTITUTIONS

THE CITY WELL PROVIDED WITH THE BURSTAN

Close in vection of beattle with attention not only to the out ide but to the in ide of things shows that the city is fairly well sup plied with those public institutions essential price with the public institutions essential to a well ordered and progressive community. A strict-on service well equipped and prompt, connects the southern and business districts with the residence quarter north and northeast. The distance is four miles, and the charge is ton cents-higher than ; ought to be but still affording easy means of communication A calife street milway system is under way one and a hill miles in total length of six miles being already built The work is now going on at the rate of 1000 feet per week and the line will be in operation before the close of the current viar. The road is a double track operated upon two streets and will connect the bay at the south end of the city with Lake Wash ington ind a system of like navigation. The cost of this important work will be \$7 000 per mile or \$1 \$000 for the whole line and the company laying it in hind is made up of Sentic and Sun Franci co capitalities. A bonns in the form of Link given to secure con truction of the road is said to be worth more than the cost of the road by \$50.000. A load to pitalist who was called upon to contribute to the sub-ridy offered seriously to build and comp the ime for the property at

ready subscribe t AN THER CASIR COMIANY Proposes to run a line from the center of the city through Malison street an east and we't the rengiblar which he cets the city. This I am assured will be built by local

The trick of Scottle ere graveled or heav ils imbered. There is no stone near at hand suitable for paying and this fact exthen why the work has been put off longer than it should have been Substantial pay

The streets are lighted by electricity both the are and meandescent systems being an operation. Give food quality 4s supplied in all parts of the city for one dollar per thousand feet less than at Portland. Water thousand test was data.

Is drawn from sever il sources but the main supply is from Lake Washington. It is pure and abundant not only for domestic uses but for sewer and fire purposes

The public buildings of Seattle are not

notable, but are sufficient for all requirements. The court house and city hall are modest structures but they answer all present demands. An armory intended to be ent demands. An armory intended to be the permanent home of the militim (which is organized in three large companies) is now under construction Sentile has had use for and good service from her home soldiers in the past and in providing generously for them she shows that there is one republic at least that is not sugrateful. Other public buildings are an Oper House finer than any on the Pacific coast outside of San Franci well furnished and capable of seating 1400 persons, two variety theaters, concerning which the least said the better an Orphans' Home the Territorial Umversity, three Home the Territorial University, three large public school buildings (of which more elsewhere) a notably fine school for girls, ander the control of the Catholic Sisters Grace hospital, belonging to the Episcopial publication, Providence hospital man rathed hear of the Catholic Sisters tained by one of the Catholio benevolent orders fliteen or more hotels the chief of which is much better than any in I ortland when is much peter usua any in cortaine.
There are two coal bunkers and eighten large docks and other buildings of sami public character too numerous for mention.
There are three daily new-papers the morning Post Intelligencer and the evening

Times and the evening Press These jou are all prosperous and enterprising and they make Seattle the news center of the whole OPPICIAL HEADQUARTERS

Although Scattle is not the official capital of the territory it has practically many of the advantages which be ong to that position Most of the offices which deal frequently and immediately with business affairs are located at Seattle naturally as the chief business center. The official residence of the chief ustice of the supreme court is at Scattle, also that of the United States marshal and also that of the United States marshal and the United States aftorney. The land office for the district of Puget sound is located at Seattle having quite recently been moved there from Olympia. The local inspectors of bullers and hulls are also afficially located at Seattle, where nine tenths of their work is to be done The city is also a sub port of entry (Port Townsend, at the foot of the sound, being the headquarters of the district), and ms office, with an essistant in cha and several deputies, is constantly main-

The streets of Seattle are numbered con-veniently after the Philadelphia plan—the town is provided with letter carrier service. There is a public park of forty acres most beautifully and fortunately situated. Of beautifully and forginately situated Or-drives there are many, but as yet none that is not in need of improvement in the inatter of grades. Within a month the city council has done a most notable and important thing in this regard. Plans and estimates have been approved for

"A BOULEVARD"

One hundred feet wide and fourteen miles long to skirt the shores of Lakes Union and Washington and reaching to the waters of the Sound at the cover south of the city. The points of greatest vaniage will be reached by this road, which must certainly be one of the most picture-que and attractive drives in the

orid
Of churches subsets and other similar pule institutions more will be said further on SEATTLE TRADE

TWO AND A HALF MILLIONS IN BELLESS-IN

NUAL SALPS AGGREGATE TEN MITLIGES A wilk through the business quarters of Seattle (there are distinctively two business quarters) cannot fast to demonstrate to the placerying outsider that the city is the of a very great trade There are five banks (three national and two territorial) each of a very house of a very house and two terratoriu) caus splendadly housed, and all apparently doing a heavy business. The numinal capital of tearlitonous is comparatively small. a heavy business. The number capital of these institutions is comparatively small, being in the aggregate only \$600,000, but the actual capital is many times greater. The deposits at the present time exceed \$2,500. 000 The manager of one of the three national banks gave me some very suggestive and surprising figures concerning the increase of deposits. "Our deposits," he said crease of deposits "Out deposits," he said aggregated \$257 000 in August last. In December the aggregate was \$350 000. In 1 ebruary they stood at \$460 000, and to-day (April 17) they are \$35 000. I think the record of the other banks is about the same

as ours " This illustrates a movement that is truly wonderful Trade is this term is understood in the commercial world applying only to the

WHOLESTLE BUSINESS Has comparatively made a recent beginning It has been so I was told only a short time since the establishment of the first exclusive ly wholesale house Pretty much all the staple lines are now represented the list in cluding dry goods, groceries, boots and shoes, hardware ship chandlery mill ma chinery farm machinery vehicles etc. The trade organization is not heavy as compared with that of ban I rancisto or Portland b what that of san Transition or Portland but it is on a whole-sile basts and is thoroughly stable. The whole amount of cripital em-ployed in jubbing 1- about \$1,000,000—not a great sum to be sure but a very good begin ning. This it should be understood is the capit d actually employed not the financial responsibility upon which the commercial agencies base their e timates. If the finanhal responsibility of the trade organizat should be computed, it would run the figures up into the tens of millions

BOURCES OF BUNINESS I asked Mr Gaizert the manager of Schwa acher d. Cos business and the achieval edged leading merchant of the city, where the heattle jobbers drew their trade from "Partly," he replied 'from Lastern Washington, partly from Aluska, but chiefly at the present time from the bound beam had been we sold a great many conductive. Latverr we sold a great many goods at blien burgh Y thina ind some beyond the Columbia river ind made a beginning in the Alaska trade. This latter busines we are cert an to get away from Portland and Sin Francico. Mr Gatzert thinks that it will be only if awayer when Scattle will con-mand the trade of the Northwe tim neces ful competition with Portland. A I Julge of it he sid this thee is a busice

THE SETACL TRADE Seattle. I very work of trothe from groves and clothing to brica brac 13 represented. The city is the shopping center for the Sound country. The aggregate capital amployed in the retail trade 1° \$2,00,000. The annual sales of merchandise in Souttle

wholesale and retail aggregate about \$10, 000 000. There has not been a fulure of any kind within the past four years

ORGANIZED INDUSTRIES

THE BEGINNINGS OF FIFTY LINES OF MANUFAL TURE-BIG LUMBER TRADE

The immediate industries of Seattle are as large in proportion as those of any city on the Pacific coast. The sawmills at the city front or a little removed, but owned and

The Stetson & Post mill cuts annually the equivalent of 25,000,000 feet of lumber worth The company employs 100 men The Oregon Improvement Company and cuts annually 20,000 000 feet of lumber worth \$240,000 This mill gives employment to seventy men The Sentile Commercial Com-pany cuts 20,000,000 feet, worth \$240,000 and employs seventy men The Western Mill Company cuts 15 000 000 feet of lumber worth \$180,000 and employs sixty men The worth \$180,000 and employs sixty men The Lake Washington mill cuts 3,000 000 feet of lumber, worth \$38,000 and employs lifteen men, and the Newell mill cuts 3,000,000 feet worth \$36,000, and employs twelve men The lumber business of Seat-tle it will be seen, yields over \$1,000,000 her vest in the vilue of product. If may be per year in the vilue of product. It may be added that the whole of the product at the present time finds ready sale in the city for the purposes of local improvement. Another lumber enterprise now in its con tructive stage, is the Satsop mill which will be the largest in the world. It will be built will

Seattle n Acces or; to the lumber business is that of logging, which is very heavy and profitable in the region near Scattle. The logs cut in King county, nearly all of which are mar keted in Scattle, aggregate 200 000 feet per day, worth \$6 50 and \$7 per 1000 This large product represents the work of twelve log ging camps along the several lines of railway and navigation the logs coming to the city both by rail and water. In the twelve log ging camps 200 men find profitable employ

Seattle capital and owned and operated by

GENELAL PACTORIES Furnitare fictories and light wood making a trimare l'ecories and light wood inaking establishments are numerous in Seattle and employ the aggregate number of 150 men Two grist mills produce 350 barrels of flour per day. A creosoing establishment dresses nits in a new technical production of the state of the propiles in a way to project them from the teredo and other sait water pesis. There is a ary duck at beattle which takes in vessels of 250 feet length or of 1800 to 2000 tons bur The cost of this establishment was \$50,000 and connected with it there is a ship yard and machine shop equipped at a total cost of \$75,000. The rathroad car and repair-ing shops will employ 150 men. The LIGHTER LINES

Of industry are well represented Six cigar factories and one agar-bet factory employ forty persons Three foundries employ 180 men There is a cracker factory, a soup factory an ice factory feed mill bran works wood pullery a tannery and a sodawater factory all of which are doing a profitable business. At least 1.0 men find work in tal lor wagon, black-muth, boot and shoe and other shops, and as many women and girls are employed in dress making and other light trades A book hindery employs five per-ons, four job printing and five new-pa per offices employ 140 men and boys in me chanical work a medicine factory cight person: Seven brick vivids employ 160 men, and will make 8 000 000 brick this season, there are three boiler shops boat building gives employment to twenty men There is a gilvanized from shop, a brass foundry three broweries and many other small beginnings which it would be tedious to recite

I have been at the puns to give these things in detail not because the enterprises are great but because they illustrate the mands of the country and the further me rtant fact that Scattle as the center is meeting the calls upon her, although in a small way. The beginnings of a hundred kinds of manufacture which may be seen here is of fix greater importance to the town thin would be one or two mammoth estab behinests operated upon a single line. To the thoughtful observer one hundred little shops means in a few years one hundred experiences.

great factories
In manufacture as in trade at Sentile the tus is wholesome There has not been a fallure for many years

THE NORTHERN PACIFIC

HOW IT HAS AFGLECTED SPATTIE, AND THE PETEOAR BHA

It is a fact well known that Seattle has long been denied advantages of radroad con nection which her position and the import-ance of her commercial and trade relations may be said to have furly entitled her may be said to have furly entitled her When the Northern Pictic came to Puget sound nearly filteen years 130 Scattle was a goodly town having long passed all compet-tion and decently buried it least two of them It would have been the a dural thing to have made the terminas at bestile but men who were prominent in the manage-ment concerred the idea of making a new cits and or selling out its lands for their own and the company a henefit 1 or any radroad this would be deemed a most unjust and greedy policy but for a road built largely preedy policy but for a road built largely by the public bounty and with the idea of benefitting the people, it was simply outgeous in accordance with the plan a large tract us bought on Commencement bay nearly thirty index south and up sound from Settle cut up into lots and blocks and called Luonia. This town has been pushed with every means at the command Northern Pacific railroad, with special design of superceding bentile as the business center of the Puget Sound country

The first brauch of the road was built from the New Tacoma to the Columbia river where another great terminal city of destroy was laid out to supercede I orthand just as I acoma was to succeed and wije out ocatile During the peralysis which followed the Jay Cooke fulure the Ticoma I and schime slept along with other Northern Pacific in treet, and it was revived with the revival of the contrary. When the Cist ide liveds wish after too was made to terrangue at I containstead of the natural joint State. I NUD A COSSECT IN

Prior to this time a road between Sentile and the neare to but on the western and of the treade beauth had been built by a company connected with the Northern Pachs and during the Vill 11 management (Villard wis content) after 1 the legit mate busines of railro ling without relate each town the peculation stans per at a part of the Northern Pacific of the But the future of Valant threw the rot a pint of the Northern Pacific system. But the failure of Valund three the root back under the mainty ment of the original Theomic Find Company, and in the interest of their own speculative enterprise they used to run their cars over the little beattle connection and as a result for more than two years following the Val for more than two years following the Vi hard collapse Swittle was without railroad ficilities except those afforded by a little con trood running to the names we tol the cty Appeals were disregarded the effort being he are hour Scattle and to remove the sert of but most to Tac ma. It was not ral that Scittle should resent this menate When the Canadian Partic was comwhen the Canadian Pattic was supplied a stemer was put on connecting nearing practically the whole business of Paget sound, went to that line Finding it necessary to meet this competition, the Northern began to operate the long neglected Seattle connection. Scattle and Tacoma

For Eastern freights, but for local freights to and from the Columbia river basin there was crimination, making it almost impos for Seattle to get any connection with the for Seattle to get any connection with au-basin. This is the situation at this time. It costs the same to send miscellaneous freight from the East or from Oregon to Seattle or to Facoma but when it comes to sending wheat from Shake river or from Walla Walla there is a heavy additional charge for bring ing it to Seattle

ADVANTAGE IN GRADES

The route from the Stamposte pass to eattle is over much easier grades and is Seattle is over much ensier grades and is shorter by several notes than to Tacoms and if the Northern Pacific would make a little connection of seven noises with the Seattle coal road it could run its trains to seattle cheaper than to Tacoma But this t refuses to do In the transportation passengers there is systematic discriming ion against Scattle

This will explain Seattle's grievance against the Northern Pacific railroad and the motive for the organization of that other road the be title, Lake Shore & Eastern which is now being pushed from Settle eastward across the Cascade mountains to Spokane Falls and other points in the Columbia river basic

SLS&ERR.

HOW SEATTLE HAS GOVE ABOUT THE WORK OF HELPING HERSELF

The Scattle Lake Shore & Castern road starts from Mill street Seattle and skirts the harbor to Smith a Cove in North Seattle where it has secured 300 agrees for terminal purposes. This land is abutting on Smith's purposes This land is abutting on Smith' Cove, which extending to deep water, is sures sufficient frontage for all present and pro pective needs. This land is situated in one body and being mainly level is excep-tionally fitted for orection of the extensive and various shops warehouses and other buildings, including all necessary trackage to accommodate the needs of a terminal of one the western shore of the cove the banks rise abruptly rendering it especially adapted for construction of coal bunkers at minimum

From Smith a Cove the road crosses to the outlet of Lake Union skirting its northern border to the shore of Lake Washington lying next to the castward, thence skirting

LAKES WARHLEGTON AND SAMAMISH

At the head of which latter it reaches the At the head of which latter it reaches the fertile and flourishing begind valley. The distance from beattle is forty miles. A large portion of the region penetrated to this point is good agricultural land, needing only to be cleared and cultivated to yield large returns and increasing business for the road. It is mainly covered by a dense growth of fir spruce and cedar timber on which extensive largeting enterprise are being the service. sprace and court innor on which extensive logging enterprises are now in operation and projected. Two logging branch roads have already been built and are in operation, giving the main line a large tributary troffic. But the most important revenue now in sight for this division of the road will be detired from the operation of the

rived from the operation of the

Of the Senttle Coal and Iron Company which are situate in S tuak vailey at the eal tern end of the first forty mile division. Here is one of the most extensive deposits of coal yet discovered on the Pacific coast. An enument engineer who recently visited it for the first time described it as a mountain of coal" time described it as a mountain of coul."
The beattle tool and Iron Company coinpo ed mainly of New York city and Proyi-dence R I, capitalists, have a property comprising 197 acres through which veins of coal run for a distance of two nules. These veins are five in number, being re-spectively 5% 6, 7%, 84 and 12 feet in thickness and are very regular in formation. They are estimated by the engineer in charge of the department to contain 10 500,000 tons of merchantable coal above a water level coa way The pitch of these vents is from 37 degs to 46 degs with in average lift of 1.300 feet. These conditions form the bress of the most economical kind of mining. This company is now developing its property for a larger output. A market has been secured and arrangements made for the disposition of at least 300 000 tons of this coal per an num Upon this large output all of which must seek lide water for shipment to marke over this division of the railroad, a freight revenue of eventy cents per ion is assured not including transportation of supplies that not including transportation to support changes etc to the mines nor the passenger maturally account, which on this traffic naturally accruing, which on this division will including that received from intermediate points, approximate if notex ceed \$5000 per month. This division is nearly level, in first-class condition with a good sub-stantial road bed heavy ties, steel roats and strong culverts treatles and bridges. Its operating expenses will be very light, owing to the character of its traffic, and ought not to exceed 10 precent of the above amount. It is after to estimate that with the present outlook, this div ion of the road will earn this year the sum of \$200,000 net a revenue certainly satisfictory to its ownerm and for coal on this coalt has been largely increased and is now increasing at a rate for in (xies, of the present output ontinue o to do a sidded poptate increise i comper ation CHE SEET BIVISION

THE LAGING R VER MINES

They are if o owned by the Scattle (on) & From Company and comprise a group of beta non-us coal veins of the mo-typical bile bitu non us coal veins of the more valuable character of better quality probably that one now worked in this territory or B tish columbia. We of the earths are of a superior quality of coicing coal. They are situated directly upon the line of the railroad within twenty live males of the famous Because it one manner of the Samous directors. emer iron names of the Snoqualmic pass known 'ocally as the Denny & frug Summit from name: which are about to be developed The completed road has just now reached the Raging river mines and they at once will

be developed to a large output. These mines furnish a very superior article of coke, which will find market and be shipped to various points on the Pacific coast, where there is a teady and constantly increasing demand. I arge quantities will be required for smelt-ing of the rich ores of Snoqualmie Pass,

SIXTEEN PAGE EDITION.

when their development begins HOP RESOURCES

The road will also pass close to the colebrated bnoqualmic hop ranch, the largest hop field in the United States comprising 360 acres The Hop Growers Association, which controls and operates this famous ranch, have already promised to the company an annual business of not less than 15 000 from their station which is certainly other large hop fields in the finoqualinite and squak valleys, the product of which is tributary to and must naturally find an outlet over this road

HON MILES

Sixty miles from Seattle—about midway of this second division of the road and on its line—the Moss Bay Hemanite Iron and Steel Company of Cumberland England has already begun the establishment of a very extensive Besseiner steel plant for the manufacture of steel rails. This point furnishes one of the best locations for the manufacture of non and steel in the United States being unularly situated in respect of its contiguity to iron ore and coal deposits, to the celebrated Birmingham district in Alabama The tichest class of ores are within twenty five miles of this point while the coal deposits are but ten miles distant. In the immediate vicinity limestone and fire-clay of superior quality are found in abundance. Following is an analysis of samples of ores from the Moss Bay Company They are pronounced by skilled Eastern manufacturer, to be the best Bessemer ores known to have been dis-

The transportation of raw material from

covered

the mans to this point where the English works will be established will be by the Scattle, Lake Shore & Eastern Rullway Com-It is calculated that this freight alone will amount to not less than 600,000 tons per annum to which must be added the transportation of supplies from thewater to these extensive works which will employ a small army of people and the carriage of a large percentage of the manufactured product to tidewater at ficattle. The road operation to these mines by September 1 of

At the present year
At the present ime the Seattle & Lake
Shore road is operated to Gilman station, a
distance of about fifty rules and the returns
from the general traffic are sufficient to pay interest on the bonds for 150 miles of cor Another ten miles will be in operation by the 1st of July

THE SNOQUALMIE I 158

Is a little higher than the level of the Stam-pede tunnel ('he N P route) but the ap-proaches to it on elther side are very much processes to it on easier sale are very much inwer it has been the policy of the engineers to 'mass the grades at the summit; that is, to make light work until the pass itself is reached. Here there will be a hard but a short pull. On the whole the route will be better and shorter than that of the Northern Pucific and the terminus on the sound (Scattle) will be thirty miles nearer the open sea

The chame of the Scattle & Lake Shore, after crossing the Cascade mountains is to spread in branches out like a lan covering the best productive sections of the Columbia

SPOKANE VALLS

Has just shown its interest in the enterprise by subscribing \$175,000 to the stock of the company. A contract for seventy five miles of the road westward from Spokane has been let, and it is intended to build 100 miles on

this end of the route during current season The division of the line which begins at the summit of the Enequalitie pass will run to Elienshing almost parallel with the N.P. line thence to or near the Salmon river

EIG BEND COUNTRY

To the Spokane connection. The suprema advantage of this line is that for a moun-iam road it can be very cheaply built, and when built operated with profit

WHEAT TRAFFIC Of the 450 000 tons of wheat now shipped from the Columbia river basin, this read 200 000 tons, which it promises to transport to tide-water at Seattle at an average charge of \$4 per ton The road east of the Cascade range will, when constructed command and natural carrier of fully scente a mineral and miscellaneous teaffl. only second in volume to that which be derived from transporting the great stapic wheat The cost of its con-struction across the territory when the mountain range shall have been passed will be comparatively light and the cost of the whole line will tail for below that of any sir ilar line on the Pacific coast I ved charges and will leave more to stockholders while permitting service at rates impossible to lines of road stiddled with an chormon bond didebt indistock i un-per mil. It is the debierate conclusion of those who have carefully investigated the project that with the present hadness out-lock for this road the volune of truffic ason truction toge her with the figulities a forded for its economical operation, there a fill he no more probtable railroad on this n truct shall be completed and in operait a. NLWSPAPTRARCHIVE®

PORTLAND, TUESDAY, MAY 29.

NOMINATION OF BLAINE IMPROBABLE A week ago T C Crawford the well known corre pondent of the New York Horid telegraphed from London 'The impression that Mr Blaine is hedging and preparing to accept the spining to accept the spining will show it.' wrong, and a short time will show it Further "Any one who imagines that Mr Blaine will change the decision contained in his Florence letter and withdraw the most pesitive utterances made by him that he would not be a candidate this year, certainly

does not know him?

Mr Blaine has put himself in a position that makes his nomination a very improba-ble thing. Since it was no doubt his intenthe term sime it was no doubt he band he cannot be disappointed. When those per some who are still pressing the nonmation of Mr Blane reach change they will find a situation that will give them pause. There will be an opposition to the proposal to nom inste him that they will besitate to meet The basis of this opposition is the behef that Biame could not be elected. It is not per sonal opposition, but its dictated by cool odgment. The West is not for Blame, and will not be sale to homiliate him against

the protest of the West.

Illimous declared for Gresham expressiv for the reason that her republican leaders did not think it safe to nominate Blame. The form of the resolution in favor of Greekam was vartually a protest against the aution of those who were installing on Blainie again Wisconsin Michigan Minussola Nebraska Co orado and lowa, states in which Blaine hereto'ore has been strong do not now look with favor upon the proposition to make him the childiste and Ohio and Indiana, states which in 1881 gave him support will now vote for others in the convention. This op-position in the West to the nomination of Bisme is a significant thing. It cannot be gnored. Hitherto Blaine's most faithful forts of those who propose to nominate him in spite of his withdrawal, facatise they do not think it would be good point to nom-matchim. They look at facts as they are

the convention meets, will notify these who are still pressing his name that they must desist. He understands the situation per fectly and therefore in present circum stances cannot want the nomination

GRESHAH

every republican yote in this state. Senstor Miccock says: "We are for Biame, but we are doing to 'Chicago to consult, not to die tate Greaham is the second choice of the Blaine men in Delaware and New York the first choice of twelve of the Mionesota delegation, and the second choice of the two spains delegation, and the second choice of the two spains delegates. Minnesota refused to delect Gen. Wakhburn of Minnesota delegate at large because hers suspected of being opposed to Gresham. Gresham is the second choice of at least one-half of the Nebraham and Colorado delegates, and after Allison Kansas and Iowa are for Gresham. The reports from New York and New Jersey are most hopeful for Gresham. Gen Martin chairman of the filling's republican with contest as I believe he desires to be New York as for Gresham and so is the country. every republican vote in this state | Benator York is for Gresham and so is the country Greeks and Levi P Morton would be unusually strong ticket, and that may

Blaine men at the West are generally for

Trealarm. We drove the who simply wish to doubte their confidence in and admiration for their doubte their confidence in and admiration for their dollars and to express their desire that he might again be a candidate are generally for Gresham as a scood choice When it shall appear, as ye may take it for granted that it will appear, as ye may take it for granted that it will appear that Mr. Blahe has not been described in the party and that his defermination but to be a chiralifact has been uploce much for all there is no other man in the country to whom so large a number of this supporters in the convention will trim as to dresham.

with the New York World, the New York Sun The New York World, the New York Beening For New York Tonoyuth Harper's Weekly all speak of Greshum's candidacy with the high est respect. The World confesses that his feetord is unlessalable.

The present number of The Opponian contains a large amount of matter about the city of Sastile It is beheved that so comprehensive an account of Seaftle's growth position, business and prospects was never before published And we think that the

typonym of enterprise Without adventibous aids and relying whoily upon thom selves, the people of Seattle bave maintained energies have never flarged their enterprise has been steadily cumulative, they have all labored in concert and with loyal devotion to their city. There is an organized public spirit at Seattle, and to it the progress of the state of the barder day.

community like an individual, may be equal to every opportunity and undertaking. At Seattle the enterprise of the people is continually making new advances, and the properts of the city are immeasurably better than at any former time.

I GO A FISHING '

the Grand Army of the Reputch held on Sunday last some resolutions were offered protesting against the perverting of Memorial Day into a day for popular carcursions and picnics. This resolution expresses a natural and just feeling on the part of the G. A.R. but it is not likely to be regarded by a world that generally behaves as if Let the dead bury their dead's and Let us eat, drink and be merry to day lest to-morrow we die were the best philosophy of life, It is not a question of public morals or of patinotism it seems to us bolely a question of sound public taste and from this standpoint it seems unwise if it is from this standpoint it seems unwise if it is from this standpoint it seems unwise if it is worth while to maintain the public respect due the duy because of its origin, for thoughful chizens to throw down all the bars and turn Memorial Day into the same bort of holiday that the New England Fast Day of he iday that the New England Fast Day has become A man inght cut his corns in hardy on Sunday without disturbing the lay, and yet it would be a real offense against the public's good taste or he might put his feet on the pew rail. The fact that a man did these things would not imply that he was a hourist in it wands only imply that he was a hourist pursue who made no distinction if the time ar place, or was so intensity nell farian that he could not recognize as whing.

as improper that was not intrinisically im- LACK OF RAILWAY FORTAL OLERES moral

out in using memorial pay for merry max mg, but it is hardly the the lase of a wise or refined public policy. It will be sure to be confugious in its example, and will only sorve to harsen the decadence of the memorial celebration, because the fervor of the day and its fun cannot exist side by side One will surely eat the other up and the day will soon become nothing but a day of frolie maniest the serious minded members to the G A R, will be prompted to drop all public celebration of their day, that has been diverted from its original purpose and popular education will suffer something by the mixtise example of devoting Mchioraf. Day to be serious when the serious suffer something by the mixtise example of devoting Mchioraf.

I cople one something to the decent 'opin ions of their fellows at is not sufficient that it many man's right to make Memorial Day a bolsterous boulds, it is not sufficient to answer that the intent to so so is not an in-

inc of good public policy for those who are old enough to know better to impair the original design of the day by devoting it to purposes pair the original design of the day by devoting it to purposes that while innocent enough are essentially foreign to its best spirit and can only tend in t me to weaken the expectness of its ob-servance. If the public want the day for play, yer will, then lot the Union veterans drop its public observance before the conta-gion of public example makes it nothing but himping funeral bonors in a community that get indic solid comfort blanging on the in ger more sold comfort francing on the lip of a street faker and a string expectantly for the stricting sound of h s car-, lereing pipe th in they appear to find in anything case whether in the heavens above the street in the heavens above.

Memorial day is sulling thro disrespect and disrepute? For when President Civoland was invited to attend last year did not that great stafesman answer. I go a lishing '?

The extended article on Scattle published to-day was written by Wr Afred Holman, formicity of The Obscorter doe of the Society for the Society for the Society for the Society for the Port Intelligence of the Society for th pencer Seattle has the best journal of Wash ington territory. OPENING OF THE BASEBALL SEASON The Portlands to Crors Bats With the Westerns

men from Sen Francisco will retrieve nece Analytic mentions morning.

The Fortlands have organized themselves into a stock company, and have taken a lease from H C Leonard of the white house grounds for len years They have also contracted with the Fortland & Williamotto Valley railroad for a beried of years to curry, both by river and tail, all the passengers going to the ball games. On Sundry both the extensive City of Selsem and the P & W P R R will make special trips, fickets being good either by host or rail.

A CHILD MISSING An Eight Year Old Boy Who Has Not Been Seen

rry Love the 8-year-old son of Mr F D I ove

Jerry Love the 8-vear-old son of Mr F D I ove of \(^{3}\) o 2 Mill street, has been missing since hunday on on His father has strong fears that he has falled into the river and been drowned. The father hing with its mother, Mrs Hold ridge Mr Love's former wife, on Fourth street, between rims and Stark and was in the habit of going up to Mr Love's house on Mill street every day of two to play with his little sister. At moon Sunday, Jerry left Mrs Holdridge's and was fold to go to the father's, aftice which this nothing has been seen of shard of Mn, except that a wordan living on Mill street fawards the river All his play halfs have been interested that she saw Jerry and another little bay short 1 o clock, Shn day going down Mill street fawards the river All his play halfs have been interested that none of them have seen him street Sunday morning. Jerry is small for his age When he left his mother a house he work a white straw hat and knet breeches and cost of a dark color. The police have been notified, but up to a late hour had heard nothing of the mhaing child. Both Mr Love and Mrs. Holdridge are well migh disappearance. Ho was a bright attractive many fresude.

MAULED WATER UP HILL

Street Sprinkfing Department Starting Under Some Difficulty

The apperintendent of the street sprinkling and cleaning department had his whole sprinkling plant eight wagons out Sunday and yesterday They cannot be used with full effect, however, until the stand pipes ordered by the council have been put up as many of the wagons have to go a long distance to be filled and the water in some cases has been put up as many of the wagons have to go a long distance to be filled and the water in the large of the property of th The superintendent of the street sprinkling and earling department had his whole sprinkline

VISITORS PROM NEW JERSEY

A Hewspaper Man in Charge of a Party of Well Pleased Tourists

Vesterday the Unionist Gazette excursion party composed of fifteen prominent New Jersey popule stricted here over the O. &t. from California and are at the Estadout They are in charge of Mr. A. V. D. Honeyman of the Somerville, N. J. Uniomat Ga. ett. They left New Lorsey three weeks ago and have traveled through the west taking in Junuar, Sant Lake, han Francisco Yosemide and other points of histories, from here they will ge to Victoria and return home via the Canada Facific. Rev. Mr. Estad, ong of the party, says that the excursionists are bifler pleased with Fortisand than any place they have seen since they started. Foi low day is a list of those in the party.

tary, T. W. Hoit, Jr., assistant secretary; F. H. Osgood, treasurer; Thomas Barke, general attorney; W. E. Thornell, manager; W. J. Jennings; general freight and passenger agent; F. A. Allen; auditor; Paul F. M. A. Allen; auditor; Paul F. M. A. Allen; and baildings; W. H. Garlock, master mechanic; M. K. Jones, road and train master. The leading spirit of the road is Mr. D.H. Gilman, who conceive the project and conducted the negotiation which have assuerd its construction.

This article was written nearly a month ago. Since that time the S. L. S. & E. Com-pany-has let a contract for construction of the through linearst to Spokane Falls. The work is to be finished and trains in opera-lian within two years from May 16th.

OTHER BAILROADS.

SORRECTION WITH THE CAPADIAN PACIFIC-THE SCUTTIERS PACIFIC LOCKING THIS WAY.

The first effect, of Seattle's strangle for an Eastern railroad connection, after it was found, in 1885, that the Northern Pacific was termined upon its overthrow, was a project for a road along the eastern side of Puget sound to connect with the Canadian Puellic, a distance of 185 miles. A company was organized for the purpose of building the proposed line, and capital for the beginning was secured at Chicago. But the company was never on a good basis and some weeks back it completely collapsed, having graded histeen miles north from the point of the ghning at Scattle and actually laid ten miles Strack. This road, with its franchises, has any been acquired through purchase by the Sentite. Lake Shore & Eastern Company, which proposes to carry out the original project. Work has, in fact, been resumed, and is being pushed with the same energy as the work on the main line across the Cascade mountains. The Seattle-A'West Coast (this is the name of the Canadian extension) runs through a fire farming, dairying and fruit country—the very best agricultural district on Puget Sound, in fact. It cannot be ted that from the beginning the road will return a fine profit.

THE COAL ROAD: Beattle has still enother road which con-nects with the coal mines at Newcastle, Ren-ton and elsewhere east and south of the city. The mileage of this road is, if I remember rightly, something more than fifty miles; and besides serving the coal mines, in whose-interest it was built, it connects a highly produtifie and well populated region with the city. The several mines whose product is brought by this road for shipment at Scattle, vield unwards of 250,000 tons per year.

SOUTHERN PACIFIC SPECULATION. There is every reason to believe, and it is Southern Pacific railroad managers intend to extend the Oregon & California road which now terminates at Fortland, to Puget Sound ann British Colombia Senetar Stanford remarked last year while visiting Scattle, that one of the most important trunk lines in the United States will be along the Pacific coast from San Diego on the south to Vancouver, the terminus of the Canadian Pacific Rail on the north. He predicted that such a would be built within the next few years. When the work now in operation north from Beattle is dnished, as it will be within the next eighteen months, only the link between Porland and Scattle will remain. The re-cent visit of Mr. Huntington and Mr. Towne, with their close examination of the countr is suggestive of designs not entirely connected with "their health;" and another circumstance of the current mouth (April) is even more suggestive. A stract of 170 acres on Mills and the control of 170 acres on Mills. Militon point, directly opposite Seattle, has been sold to "a San Francisco syndicate" for a large sum. The situation is admirable for terminal purposes, and several members of the syndicate are directly, connected with the Southern Pacific Railroad Company.

THE REASON WHY.

MOW, IT IS THAT SEATTLE HAS MAINTAINED HEE POSITION AGAINST GREAT OLDS.

"How is it that Seattle, in spile of raff-road opposition and discrimination, has been able to hold the commercial and trade supremacy of the Sound, and to maintain her status as the chief city of the territory?"—this question is asked, by sny-person who comes to Scattle, and see how the city has outsiripped all rivals. The answer is not found in one offermatance but in many. First Seattle holds a commandi position with reference to the Puget Sound basin and its trade. It is the central point as the Sound and is the only place that can apport a reasonable claim to that position. from the entrance of the Sound to Elliott ay (Scattle harbor) the distance is forty bay (Seattle harbor) the distance is fonty veloped, will afford labor miles; from Elliott bay to Tacoma, sands of workmen, and bru in the other direction, it is thirty return of money into the complete, from Elliott bay to Olympia the lime, the agricultural the lime, the agricultural the lime, the agricultural the lime, the agricultural to counts in the productive country of the aggretate their value and i counts in the productive country of the limber of King county is jurget annual basin it is nearer in miles to Seattle than to Tacoma, and in order to get to Tacoma a boat must pass the city front of the lime of the labor work when the labor will afford labor miles of workmen, and bru return of memory into the country of the lime, the agricultural the l

Soutile than to Tacoma, and in order to get to Tacoma a boat must pass the city front of Seattle. Nearly two years ago the citive of The Orneomian wrote as follows:

Seattle has long been the central point or deput of the budiess of Puget sound. It owes this partly to its position and partly to the energy and enterprise of its oftimes. Seattle's position in the budiess system of the Sound country is a food-station of long growth, the result of nearly forces, aided by the intelligence and spirit of the people. Budience sealing or such a basis is as limity formeded as a tree that grows by almost imported by a manners exclude a such a basis is as limity formeded as a tree that grows by almost imported by the property of the pro

This is as true now as then, with the additional important fact that the development of the past two years has added its full proportion to the business of Scattle. Instead of eighty there are now upwards of one hun-dred trading boats which make their head-quarters at Seattle. Indeed, all but four of the of the boats which trade on the Sound consider Scattle their home post. AGRICULTURAL RESOURCES.

Those who imagine that the Poget Sound country is a witherness, productive only of saw logs, have a very inadequate notion of the situation. The Sound, with its islands, has subore-line of nearly 2000 miles; and of his ishore-line of nearly 2000 inites; and of the land abutting upon it and near at hard about ten percent is of the kind called in the Northwest "creek bottom land." All of this is extremely fertile, while even the densely timbered country is valuable for range, and when cleared of its timber useful for the general purposes of agriculture. The small river valleys are almost innumerable. There is no record by which it is possible to show the value of agricultural production in the Sound basin, but a business which supports the value of agricultural prediction in the Sound basin, but a business which supports the service of over one hundred trading hoats, contributes to the support of large steamable lines and bus been the greatest feature in the traffic and development of Seattle, is no small thing. In a country like Oregon it is very natural for people to believe that there can be no profitable agricultural insister without wide ranges of open five interiors and the product agent five indestry without wide ranges of open country, but nothing can be further from the trath. One are of loop, will employ fifty times as much labor is one are of wheat and the product will yield fifty or one hundred times as much money. Value of protest of the agricultural worth of a country and of its especies to support population. By this test one acres of bottom lamifies this

east, and it is more then likely that they of wheat land. The agricultural industry will form the Eastern and Western divisions of the Puget sound country, already large, respectively of a through Eastern line.

The officers of the S. & L. B. R. R. are as before all the land at present available is follows: J. R. McDonald, president; D. H. School and the land at present available is follows: J. R. McDonald, president; D. H. School and the limber is removed.

While the resources of the Puget sound the new position was a superior of the regressions the same any other point, the advantage (in the absence of the larger railrond, coal and iron development of the present time) was not so great but that the position of the city was in serious hazard. The deadly discrin the interest of its speculative enterprise at Tacoma, for a long time shutting out any cort of railroad lacility, threatened to pura lyze the town. Although the city never lost its grip, there was a time for a year or more when its fate hung in the balance; but it was' awed through the exceptional spirit of its people. They know their advantages through nature, but they did not deceive themse as to the danger. The interests of each became the interests of ally and they WOREED AR ORE WAY.

RECENT PROGRESS.

GROWTH OF BUSINESS AND POPULATION ILLUS-

TRATED BY FACTS AND FIGURES.

The most progressive era in the history of

Beattle is just now at its hight. The depression in the lumber industry, coincident with the Villard failure, ended nearly two years

ago and has been followed by an extremely active demand. All the Sound mills are

running on full time finding ready sale at large prices for their product. This mouns an active demand for logs, labor, heavy

teams, forage, provisions of all kinds. It means the presence of many ships, the supplying of which greatly adds to the hasiness of the country. The local business, too, is more active than for a long time past and the output of the minas directly tributary to Seattle har largely increased. Formistion

Seattle has largely increased. Populati

too is pouring into the country at a rate

never before equaled. Railroad construction

ls going on upon two routes tributary to the city. All these activities are reflected natu-

important facts.

gan: Maine and other lumber regions

ofitable for lumbering, because it w

They decided to take the bull by the horns and instead of weakly trying to conciliate the Northern Pacific set about fighting it.' And they fought it with nerve and intelligence. The West Coast connection with the Ca-nadian Pacific and the Lake Shore and Eastnadian Pacine and the Laxe more and East-ern—these are the weapons of their warfare. But for the discriminating policy of the Northern Pacific these enterprises would never have been thought of. The spirit of enterprises and local faith well groused has not halted with measures to

meet the railroad situation. It is seen and lelt in everything. Everybody pu a together in every project that has the advantage dut of Beattle for its object, and the result, is the most active and progressive city of its size in the United States. I saked Hon. E. P. It is o Ferry (for many years governor of the territory and now a prominent banker how he explained the exceptional activity of the "who has a dollar is willing to invest it here, confident in the future of the town; and those who have money are willing to lend it to those who will make use of it in increas-ing the scope of our business."

What way be termed the "personal element" enters into the development of public as well as of private fortunes. Stirring men

AS'A PORT.

EORE PINES-IN THE WOODD-ITS ADVANTAGES

The circumstance, upon which a large part of Seattle's great expectation is based is its character as a commercial seaport. Bo-tween the open sea and the harbor of Elliott bay there is not even the suggestion of a bar, not a real not a shoal. The road between Scattle and the sea is as deep and safe as the ocean itself. For convenience, ships are usually lowed from Port. Townsend, forty miles north of Seattle at the entrance to the Sound. but they can sail down and very commonly do so. Even now, while as yet Scattle, is shut out by milroad discrimination from the business of the producing country east of the Pascades mountains, she does a large direct business with the ocean. Her two clief exports are coal and lumber and of these about 200 ships per year are disputched from her docks. There is a regular ocean steamship line between San Francisco and the Puget sound ports, and fivesixths of the business of the weekly steamer is with Scattle. The list of passengers averages about 100 in number, of which usually about seventy live are destined for Scattle. about twenty for Tacoma and the rest for Port Townsend. The same proportion holds good in the matter of freight. The Canadian Psellic Railroad Company operates a steamship, the Premier, regularly between its ter-minus, Vancouver, and Seattle, doing a large business. The bulk of the merchand which comes to Seattle from the East takes the support of their patronage to the Northern Pacific, which is regarded as an open enemy

to the town.

The Seattle harbor is the best on the Sound, since it affords anchorage which is not available at Commencement hay and other points. It is the first harbor on the east share of the Sound coming from the sea, and is nearer the producing country than any other.

KING COUNTY.

AREA, TWO THOUSAND SQUARE MILES-IROR,

King pounty, in which Scattle to site onably the first county of the territury Its area is shout 2000 square miles. great-state. The coal mines; which have been mentioned incidentally elsewhere, are practically inexhaustible, and when fully dewideped: will afford: labor for many thou-sands of workman, and bring an incalculable return of money into the country. The iron, the lime, the agricultural resources—these have been spoken of: No account could exaggerate their value and importance. The timber of King county is just now its most

Of nertionic to speak, but demot refrain from more than incidental notice of one or two conspicuous products. In point of value hops is the chief crop. The acreage planted is about 1900, and the average annual yield about 2000 pounds to the acre. It is pour land and poorer cultivation that does not produce 1800 pounds to the acre, while not unfrequently 2500 pounds are grown, and under the most favorable circumstances occasionally 3000.
The average, though, is about as stated.
When it is borne in mind that 600 pounds to the acre is considered an excellent yield in the Eastern states and Europe, the advantages of the farmer, here will be appreciated. It may also be said that a crop failure was never known here from any cause. Neither drought, moisture, insects or other plagues of the hop-growers elsewhere have cver been known to hurt the grower of this territory. The cost of production and marketing of The cost of production and marketing of hops is under 8 cents per pound. The average price received is over 20 cents. The fluctuations in price, however, is great. Occasionally hops go down to eight, nine and ten cents a pound, enabling farmers to merely realize the cost of production, and again they go to sixty and eighty cents a pound, and one reason (1883) they brought over a dollar a pound. The crop of 1886 sold at from twenty to thirty-five cents per nound, averaging over twenty five cents

1886 sold at from twenty to thirty-five cents per pound, averaging over twenty-five cents, and bringing to furmers in the neighborhood of Beattle \$1,000,000. The advantage of the Puget sound farmer may be readily realized from the foregoing statements. Unlike his Eastern brothren, he never grows hops at a loss, his crops never fail, his yield is more than three times as great as theirs, and his profits proportionately greater and more certain. These things being true, it may be wondered why the cultivation of hops is not more general; in fact, why the efforts to monopolize the production does not follow, and cording to the laws of trade. This is quite sure to be the ultimate result. It cannot be, however, until the population is greatly increased. The production is now about as great as the capacity of the country to hancreased. The production is now about as great as the capacity of the country to handle. The supply of pickers is insufficient, and if more hops were grown they would simply spall for want of help to harvest them. This will be remedied, though, beinningration, when it is safe to say the King county, production will be multiplied five, and parhaps ten times over.

OFFICE FARM PRODUCTS. Mired farraing is carried on in Kingcounty generally, Faculare all bayerines produced, regionally, parties, position, parties, pa

which catches the eye of the approaching visitor is a school house. During my visit within the current month the direct of these several buildings, the Central in which 780 children and fourteen teachers were employed burned to the ground. The loss was \$35,000, but within two days it had been determined to replace it with a larger building of brick taccet \$25,000, and while the nucethav fields, etc. The annual yield of hay is 10,000 tons, worth usually-from \$9 to \$13 a ton. The yield perfected great. Two tons is below the average for good lands; three, four, and even five tone being not uncom-mon. This hay is all consumed in the counmon. This hay is all consumed in the country, going to feed intoke to the farms, horses in the towns, and cattle in the lorging camps. Potatoes is another considerable crop, the yield being from 75,009, to 190,000 bushels per annum, for which from 35 to 60 cents a of brick to cost \$75,000; and while the meeting was about it, another building was or-dered for the southern part of town to cost \$50,000. There was a question as to whether the new Central building should be of brick or hashel is obtained. Potatoes yield from 500 bushels is obtained. The control of the control of the occasional production of 600, 700 and even 800 bushels. But little wood and as the decision involved a very considerable difference in cost, the directors intimated that they would like an expression wheat, burley and rye are grown, oats being the leading grain, the annual production being about 30,000 bushels: Oats yield as high from the heavier tax-payers. Responding this suggestion the "brick" advocates adopt Luoyel method of petition. A single-press 60: Fruit culture, has been pushed further in King county them. brick of perfect form was wrapped in pareliment in a way only to expose the ends. On in King county than in any other county in Vestern Washington, Except strawberries, owever, the fruit substantially all finds sale one side was written ! We the undersigned tax-payers of the school district request the directors to rebuild the Central School in Signatures followed hour's canvass the brick was found too King county is one of the best wooded regions to be found. The entire water front of the county, about eighty miles on Puget sound, and nearly as much more on Lakes Samanish and Washington, is fringed with small for the names

THE SCHOOLS In the five public schools of Scattle twentyin one ive public schools of Scattle twenty-eight teachers are employed; and 1537 pupils are in attendance. It is a notable fact, cred-itable both to the people of Scattle and to their retnois that the average attendance is higher than in any other city in the United States. Scattle does not believe in cheap teachers. In the control school forwism a beavy border of timber. This reaches back, with breaks here and there, to the summit of the Cascade mountains, and including is not all heavily wooded. In fact, much of it in these days of waste is considered unteachers. In the central school fourteer teachers are paid \$1110 per month; in the Denny school eleven teachers are paid \$225 per month; in the south school two teachers wield 30 000 to 60 000 feet per acre. When per month; in the south school tw timber here becomes scareer and more valuable, as in Maine, New York and Michigan to-day, lands now rejected by the logger will are paid \$130 per month, and in the Jackson school one teacher is paid \$70 per month. The whole monthly cost of the public schools, be carefully gone over, and after the cutting not reckoning the value of the property, is \$2472 50 per month. The value of the buildings is \$85,000, and two new ones to be creeked during the coming year at a cost of \$125,000 will make the total valuation \$210,000. It is estimated there are 800,000 acres of timber land within King county limits, upon which fir, spruce, hemlock, piner codar, alder, maple and ash grow. About \$69,000 acres are in fir, and 150,000 acres in the other

The excellence of the public scho woods. Including the light yield of the hard woods with the heavier yield of the fir. Scattle has had the natural effect of leaving a narrow and scanty field for private schools.

The only notable school is the Catholic
"Academy of Holy Names," under the management of one of the several orders of sis-ters. It is housed handsomely in a fine four-000 feet in the aggregate. The cut in 1886, was about 25,000,000 feet, and in 1884 and 1885, about 40,000,000. Much log having is now done by rail, over the lines of the Co-lumbia & Paget Sound and the Paget Sound story structure crected at a cost of \$30, It has somewhere in the neighborhoo of fifty boarding pupils and double that number of day pupils and is a prosporous and useful institution. Other private schools terprises have been recently inaugurated, and the prospect is good for a cut of 30,000,000 feet of timber in 1887. A great deal are not largely attended.

The Territorial University, the beginning of what must as the territory grows, become a great school, is located at Seattle and its campus of ten acres crowns a fine bill in the northern part of the city. This ground, now worth not less than \$125,000 and probably more was donated for university purposes some years ugo by Mr. A. A. Denny and the late O. O. Terry. The university is under-the presidency of Prof. T. M. Gatch formerly and for many years president of the Will-amette University of Salem Oregon. The faculty is as yet small there being in all but five professors, two of whom are women. While thus operated upon a limited plan, the university is thorough in its method, its standards and standing are high and it is financially prosperous. The territorial profinancially prosperous. The territorial provision for its support is \$10,200 annually. The value of its four college buildings (all are of wood) is about \$25,000.

SOCIAL CONDITIONS.

ITY OF THE PROPLE OF BEATTLE.

While the population of Scattle is drawn from all parts of the world, the tone of the social body is distinctly in harmony with New England ideas. There is, of course, difference—somewhat he of social policit, somewhat more of what may be termed the universal spirit. Probably half the people of Seattle were educated originally in a narrow school of experience, but they have broadened under the activities of life in the West. The old New England principles, however, form the solid groundwork of society while a spirit of enterprise un-known in New England itself has been developed by the opportunities and necessities of a new country. A writer who looks into the causes of things will be surprised first at the habit of the people of Sentile to unite in projects for the public benefit; and second, at the comparative youth of the leading men of the town. In this new and ethring city brains and energy count for as much as money, and a man does not need to have a million dollars be ore he can convince his fellow citizens that his judgments have value. The recognized leading spirits of the town are not men who have become rich, lazy and conservative, but of making; whose successes are not all in the past,

THE REFINEMENTS OF LIFE.

While "energy" is still the rallying word of the town, there has been no want of attention to those things which go to make up a wholesome and refined civilization. The city has never declined to tax itself for educational purposes in any sum required for, improving the school system. All the churches are represented, there being twentychurches are represented, there being twenty-three church buildings. Charities are well-organized and liberally supported. The judgments of the city find expression through regularly organized bodies, hoards of brade, etc. The various social orders, including the G. A. R., have large memberships,

ground changing hands is acquired for purposes of building. Since January 1 three hundred dwellings have been built and at this time there are five hundred in process of construction. That these houses are built to live in is demonstrated by the fact that there is not one programmed heart. THE SUCIAL ORGANIZATION In the conventional sense is as yet very democratic, but the materials are here for a most charming seciety. The number of young men of good breeding and education who have come out to "grow up with the country," many of them with abundant financial resources, is very large. It is this disperse in town. Increasing population is based upon increasing industry. There is no enforced idleness. forced idleness.

Recent progress is illustrated by many things. Banking returns report deposits more than doubled within the past year. For the quarter ending June 30 last the resources, is very large. It is this element that has quite recently been most active in bringing about the organization of the Rainier Club, which promises to be an im-portant factor in the social and business life Computed in its lowest terms was \$4,700 28; for the quarter ended September 30 the figures were \$5,120 66; for the quarter ended December 30, \$6,600 94, and for the quarter ended the Sist of Moreh, \$7,323 62. The prodigious development of the postal traffic has so far outgrown the capacity of the post-office forces that several additional clerks have been employed and paid by wives a stream. of the city. The large number of young men of the better class is one of the first and promising features which comes under the notice of the visitor. SOCIAL STABILITY.

In no other city on the Pavilic coast, excepting San Francisco in an early day, has the stability of the body social been so severely tried as Seattle. A little more than two years ago I was in Seattle when her cititwo years ago I was in Seattle when her citizens to the number of hundreds were guarding the honor of their city and their own homes with guns in their hands. A body of rioters had endeavored by brutality and force to drive from the city and territory a hundful of Chinese who were in the country under the assurance of international treaty. At Tacoma and other points on the Sound, similar lawless enterprises had been successful and the leading spirits of disorder had assembled for a final and notable assault at Seattle. The chief of police, a swapering My own judgment is that these figures are a little too high, but there are certainly not less than 18,000. Even if this lower figure sembled for a final and notable assault at Seattle. The chief of police, a swaggering ruffian, turned traitor to law and duty, and headed the mobin its assaults in the Chinese quarter. The city woke up one morning to find that the rights of international law had been violated, and that a hundred or more Chinese type confined on a dock awaiting transportation to San Francisco. The citizens fell into line under the leadership of men of character and courage, and the imprisoned wretches were taken from the mode and returned to their homes. This was not he accepted, it makes an advance of coupin twelve months, and this 1 think a moderate estimate. What the population will be in five years is of course purely a matter of speculation, but it is believed confidently by many that it will reach 100700. The increase in the value of real property by improve-ment and otherwise is beyond; the range; of reasonable estimation. EDUCATIONAL and returned to their homes. This was not accomplished without a struggle, but it was short and sharp, and when the smoke cleared way one rioter lay dead and two others were borne to the hospital. It was a sud day, but it was a great day, for it ellowed the same generous as any of them. Three of the physical nerve to enforce the dictates of law and humanity, and to protect he riself from the mob

ations. Seattle has had her social troubles; GOODPILACE TO LIVE.

As a place of residence Seattle has many attractions. The climate is wholesome and genial. In ten years there has been a difference of less than three degrees in the com-parative temperatures of corresponding parative temperatures of corresponding months, 1878 having the lowest average of any of the past ten years, as follows: January, 4214; February, 3214; March, 4634; April, 4914; May, 5614; June, 5914; July, 62; April, 4914; May, 5614; June, 5914; October, 501 August, 614; September, 574; October, 50; Royember, 43; December, 42. The rainfall For the past ten years is as follows: 1878, 48.38 inches; 1870, 64.87 inches; 1880, 49.35 inches; 1881, 53.82 inches; 1882, 42.58 inches; 1883, 34.85 inches; 1884, 34.03 inches; 1833, 34.85 inches; 1881, 34.02 inches; 1885, 43.63 inches; 1886, 34.02 inches. This inches; 1887, 40.90 inches. This record is kindly furnished by Mr. R. M. Hoskinson, a practical weather observer liv-ing on the island opposite Scattle. It will be seen then that the average temperature is easily within the range of wholesome and pleasant conditions. The scenery is fine. The surroundings are particularly attractive to those who find pleasure in the woods, in riding, etc. Arsenic creek, a trout stream-five miles northeast of town, affords many aftering retreats, especially at Ravena springs, whose waters have various healing virtues. Green Lake, four or five miles north of the city, is another charming place. Here an enterprising real estate man has hid out a suburban town. He proposes to build a fine hotel and the Seattle Lake Shore & Eastern railroad bas engaged to build a branch and to operate it by hourly trains. In the city there is always the activity congenial to those who are for of "life." There is companionship to suit every taste, with the facilities for living in any style one may choose and be willing pay for. For growing families there is no luck of refined and moral influence, with far better chances for a good start in life

IS IT PERMANENT?

REVIEW OF THE CIECUMSTANCES WHICH BEM-ONSTRATE THAT IT IS.

As the writer notes the really wonderful netivities in Scattle, including the building which seems going on everywhere, he asks naturally, is this a "boom" or is this a substantial and permanent growth? As an bserver wholly disinterested I have looked for an answer to this question, and in my judgment, the growth of Seattle has it causes in substantial and permanent advances in the country. The "boom" in Senttle is in real estate—that of course will not continue always; but in the activities of general business, transportation and manufacture there is only the reflection of growing population and expanding industry in the country leading to and connected with the ity.

In my judgment, Seattle will maintain hercommand of the Sound basin as against Tacouna. Her position is central, while Tacouna.

ma's is not. Seattle is nearer the eastern district by a few miles than Tacoma (by either the Stampede or the Snoqualmic passes) and the grades are better than to Tacoma. Scattle is thirty miles nearer the son than Tacoma and she has infinitely a better harbor. Seattle has beaten Tacoma to this time under every sort of disadvantage and to-day practically monopolizes the business of the Sound country. For example, I compared the Ledger of Tacoma and the Post Intelligencer of Seattle of to-day, both fair average week-day editions for a hint as to the relative business status of the two towns with the following result: The Ledger had umne of advertisements, of which sixteen were of the "boom" variety, real estate, etc., while eight stood for miscellaneous business, The Post-Intelligencer of same date had twenty-four long columns (about twenty-four inches) of advertisements, of which six were of the "boom" variety, real estate, etc., while eighteen represented miscellaneous business. Here, it will be seen, is eighteen columns of twenty-four inches each as against eight columns of fifteen inches each. When it is considered that the advertising charges of the Part-Intelligencer are greater by 40 per cent, than those of the Ledger and that the latter has a practical monopoly while the Post-Intelligencer has a very respectible com-petitor in its local field, the illustration be-

came very striking.
The Northern Pacific cannot long continue its policy of discrimination in favor of Tacoma and against Seattle, on the one hand and Portland on the other. The time must soon come when that road must be run on business principles instead of in the in-terest of an inside ring of land speculators. This, while it will not be a death-blow" to This, while it will not be a "deall-blow" to Tacoma, will kill its pretensions as a competitor to Seutile, which for her pluck and success deserves the fille which has been given her, that of the Queen City. A. H. April 25th.

ago. Developments within the past thirty-days have been most fortunate for the city. A contract has been to for completion of the main line of the Seattle, Lakeshore & Eastern road, from Senttle through to Spo-kane Falls, and the work is now in energetic announcement is made that Mr. Henry Vil. announcement is made that Mr. Henry Villard is to assume practical control of the Northern Pacific in July, which assures Se. 3. atta all she wants, namely, a fair chance. The developments of the past tend to confirm all that is said above concerning the prospects of the city.

A. H. Scattle May 21st. prospects of the city. Scattle, May 21st.

"Landlord: Tell us please who is the best real estate firm in Senttle?" "Yes, sir! I will. Eshelman, Lleweilyn & Co., are the leading firm not only of Senttle, but of that Northwest. They are reliable, responsible and liberal, have the largest list of city and suburban property in Seattle, and buy and sell more property than anybody. They refer to the banks of Seattle, and if you want to see business just go to their offices. Why they keep in constant use, showing lots free to their customers, the entire outfit of the urgest livery stable in Seattle. You just follow that crowd and you will find yourself in their offices."

A FINE STOCK.

Clarence A. Leeper, 807 Front Street.
Scattle, W. T., carries the finest, most complete and best selected stock of boots and shoes in the city. Every man knows the discomior of an ill-fitting boot or shoe, and this fact is patent to those of the fairer sex. Leeper allows no "misfits" to leave his store. He keeps shoes for the rich, boots for the poor and always guarantees satisfaction.

Seattle is headquarters for all steamers plying on Puget Sound waters; 168 in number. Seattle is the railroad center of Puget; Sound; the commercial, manufacturing and financial center of Puget Sound, and in 1900. Will be the metropolis of the Pacific coast. Secure a foothold now. Edelman, Llewellyn & Co., will sell you the letts, or send you printed descriptive matter.

The Academy of the Boly Names
Is a bourding and day school for girls in Seattle, W. T. The curriculum includes a thorough instruction in all the English brancher, also in art, music, elecution, and the languages. Information cheerfully furnished.

It will pay you to seeme a lot in Scattle. It will pay you to call on or write to Eshelman, Liewellyn & Go. for full particulars about Seattle and prices of lots. One year acroes you will wish you had bought lots in Scattle.

The Huron Lumber Company, of Seattle, have their mill at Winsor, on the line of the Seattle, Lake Shore & Esatem rational. They furnish imper, logs and shingles. They fill all orders promptly. "Give me a ticket to Rebelman, Liewellyn Co.'s office at: Seattle, please," is the cry

in the Northwest.

GULLING FARMERS There is constant mention in the pre s of

There is constant mention in the pre s of the country of a class of swindlers who live by the gulliplity of a class of farmers who seem born to be swindled. The last instance we hear of happened at the East where rus cals went about buying produce of the farm, paying for it and taking a receipt for the money paid. They were to send for the produce when they got raidy, and the farmers wondered why it was neach sent for. They duce when they got used, and the latters wondered why it was never sent for They found out the game when a neighboring bank called on them to prypromissory notes for considerable same. The fraud by in their obliterating the writing used for the recoupt leaving the signature and writing to the note of hand. This was a scheme that the note of hand. This was a scheme that would deserve the very their unities schooler to understand never to stan a document of any kind to a stranger. It is a said rule, for all rose to follow never to sign a paper of the kind. If a man wants your produce let him come and take possession. If any mar comes along with a plausible story and winds to constitute a farmer to writing with a page of the properties according to the properties according to the properties of the standard of the properties according to the properties of the properties. withis to commit a farmer to writing with no previous acquanitance its proper to ad-peot hum and decline the deal Livery farmer who read should know that tracks are hat hing against unstapacting people its safe to refuse to it ten to my

tricks are listeling against unsuspecting people it is safe to refuse to it ten to my min who presents a scheme like the one list year discelin Linu county for the purchase of certain whith at extriordin typiffers. As a rule everything that is unfairsomable is dishonest boint years ago men went about with illustrated books that discibled certain new and very remittishifferius and shrabs. They captivited their victims with these pictures and took orders for rise fruits and rarer flowers at prices fully as rare and went their way. In time shipments of traces etc. came to all this towns in the Willamette valley. It was thought these orders were, in the aggregats for time of thousands of dollars. A certain man who was suspicious went to the bottom of the business end found that these men filled these orders from the cultings of Oragon nurseries. They went about huying in ferior trees and plants and then reproked and labeled than to suit the orders received. The matter was exposed and the orders were left in the express offices to dry up. Some it's who took their trees found out for them selves how they were windled. Surfagnes on a sin ther se de, perhaps are being constantly played. Farmers cannot afford to speculate, and if they are careful they won the office.

The basis of all swindles, like the sile of the crop of grain to be raised another year it a great price is the avarice of the farmer. All who were bitten in that scheme are that it was uncoonable yet were deceived because they wanted more than they had a reasonable right to expect. Avarice and preed lead many into trouble and the farmer should be above such low desires and selfishness. If onlybody tries to all you or lend you even anything you don't need or don't understand simply turn a deaf ear to them. There is a gime up and you are the destined victim. Bon't be talked into anything if you don't wish to be bumbugged and swindled.

ive years double the hay it can produce it out in the ordinary way. Some just in clover with grass for a hay some just in clover ripens ahead of the timothy if put in with it and you cannot in the perfectly good hay of both. Or hard grass and clover ripen in nearly the same time affil work together better than timothy and clover. There may be other grasses that will do the same. I monthy any feel is hard to digest especially if cut view ripe hard to digest.

a machine that plants and covers at the ame time.

Considering the great demand for this neticle of commerce and the certainty of it production where well done it is a share to our state that its farmers do not ruise them here and supply the entire demand. They are extraored; grown in California and can be grown well and to good profit in all Kastern Oregon and Wishington. It is no doubt true that in the driest years they have coast of the mount into beans can be grown to good advantage. Of course the bridesper ments can be made on a small scale to letter when and how to plant and how much cultiviation is necessary.

A great deal has been said in favor of taking the horns off cattle, and for a long time it was a one-said story but it seems that there are times when the process is not so successful and the cattle are not so happy afterwards. A farmer who returned from afterwirls. A farmer who returned from the E est this spring tried it on his own catale, and they did not recover soon or gain their appetite. Somewhere out West the dishorm in g process was tried and the results were quite districted in that whole neighborshood cathe were in a very distressed condition. Hundreds of them suffered terribly and it seemed hardly possible for many of them to recover from its effects. The cut horis mattarated and magnets filled the space the fields becoming putted. This was told in the news department of a Western journal, and it was not expected in inch the did stock thus affected could live. m in he id of stock thus affected could live It uppears that conditions must not only favor but the weather must also suit. What the cause of these disastrous results may have been did not teamstre and could not be told. The general sentiments thereabouts was in I were of letting well enough alone. Before any further dishonoring is done by that community they will need to see proof that no such results as above stated, will follow.

THE PEACH

It has been supposed that peaches will not grow successfully in most of Western Oregon and it in y be true in a degree but it appears that there are localities suited to this fruit and wherever it can thrive it should be planted. The peach produced in this valley market. There are some points in peach growing that require to be forced home to the minds of all who grow peaches. It is common to see trees with long, bare branches to provent this can be done by beginning early to prune thoroughly. The tree should have branches from the ground up and these should have branches from the ground up and these should have branches from the ground. beginning early to prune thoroughly and tree should have branches from the ground up and these should be thinned to the proper to harmonize and number enough being left to harmon balance the tree and no more. K number enough being left to harmonize and balance the tree and no more. Keep the tree as low as possible, and the middle of August prime back one-third of the niw wood. The peach bears on last year's wood only and cutting back when the growth of the year is chiefly mide causes the remaining bads to be stronger and bear more certainly. The tree gams solidity by it and the limbs are more apt to throw out branches as you wish. By keeping the free in compact shape, you prevent the limbs from growing so long without branches, and make the tree overy way stronger and more healthy and more certain to bear full crops of fruit. During the growing season waich all fruit trees, and have then only produce now wood as you want it tut out or pinch off all superfluous limbs. Be sure and leave enough and no more. There are young shoots starting out that grow in and cross other limbs. Leave all that have a plate to till and can be of permanent value to the tree in bearing and leave no more.

dented water fall is report throughout the west At Quantition for the water and water an HANDLING COLTS. It is not possible to begin too soon to educate a colt and teach it what it must nitimately know It must first of all know that man is its friend and protector. If taught this and only allowed to associate with man is its friend and protector. If taught this and only allowed to associate with friendly persons who will be kind to it, the young foal will soon appreciate kindness and show contidence. There are many persons who are not fit to handle a horse, it all and should never have anything to do with a foot These are persons who lack judgment and are ill attracted or high tempered by in the interaction of the interaction. In the interaction of the int

towing licts concerning prices of wool at home and abroad. Port Philip his fine wool from Australia equal to our American Merino flecas let us pretaise.

Fort Philip unwashed sells in London at 22 cents. Ohio XX, which it resembles, on the properties of market sells at dles Seents, because the market sells at dles Seents. A tike grade of Ohio combing brings & cents ahead. A tike grade of Ohio combine brings & cents all control of the sense of the sense of the grade of Ohio combine brings & cents and the month of the fights and fish combing, washed sell in Frigiand at 22 to 2 tents. So it seems our tariff increases the price of these wools amout 13 cents a pound. Cansal combining wool is worth there M cents and the same grade sells here at 3 cents.

Mellor & Co express the belief that to lower the duty on wool would make wools growing unprofitable at least east of the Mississiparities unless related on mutton which priced. The tariff med dentalls that has the effect to make mutton che uper than beef and turnishes wholesome and excellent meat to our working classes it a much lower figure than it brings in Frighting.

it a now helower figure them it brings in Fogland.
The alloy fit teform the summary of what I dward Melloy & to hely to say concerning the effect of tenff rates on wool

BUSTAIRING AN ORCHARD

The crude ideas some people have of the uses of things is allown in a request from a reduct to know it land player can help an orchird that overhore in 1886 and did not be it well in 1887. Now the orchard that bork a large crop of fruit drew out of the soil introgen potable unit phosphoric stad and the land wants the e back again, and more of the same kind. Land plaster is chich; sulphur and hime, and to offer these to land that saks for that there is a much as if your children saked for bread and you give them a stone. The best thing for a wors and orchard, or other wors-out land, is good stable manure.

Many of our orchardists are expecting crops for generations without any return to the soil. It is doubtless true that as the roots of trees grow deep, they draw their nourishment from land in a memore that does not quickly exhaust its letting qualities, so it is preferable.

THE HAY CROP

Very soon haying will be in order and many meadows will yield so light a crop that their owners will wonder what is the reason the grass is so poor and the quantity so light.

There may be several reasons, and it is the business of the tarmer to anticipate them.

There may be several reasons, and it is the humaness of the tarmer to anticipate them and provide against them. Many a time stock are allowed to run on a meadow just for the convenience of the moment when every farmer knows that trampling a time that sheep and swine are apt to mp and whin it is one so is the plant. Larger stock shows a sepecially—trample on this bulb and injure it and when the ground is wet there is creating that any stock running on a meadow will do great damage. It is more thing to make a good meadow and when once made its worth preserving. It is claimed that themothy needs resuming every three or four years, but there are, time only meadow on the Sound inverse that were sowed fully twenty years ago and have remained good for all that time. The way to prepare a piece of low fund for a line, torp is to underdrain it thoroughly and put in the seed on land deeply and thoroughly indeput many the seed on land deeply and thoroughly pulverized. The their you can make the surface soil the better. Drainage effects two good ends at a cries off the superfluous water and less into the lower soil moisture with the atmospheria air. Thus it virtually drains and part full irregate. Spend \$20 to put a meadow in order for each ure not seed with a true and so will get the money back with large in terest in increase of crops. Harre is immense statist from it realizing excellent returns from lands, and thorough full age is the secret. Nowhere will the more necessary or pay better than on a piece of me sdow land. Once in order such land will su time and continued of and part will yield in five years double the hay it can produce a put in the colinary way.

A Min who Balleves in Advertising, and who Shows Unbounded Paith in the Future of the "Queen City."

MAN WHO ADVERTISES SEATTLE.

Although C. C. Calkins arrived in Seattle only some seven months ago, from Colorado, and has been in business only the past five months, he has earned for himself a name and reputation, for honesty and integrity, fair dealing and honor, second to none in the city. Mr. Calkins has proven himself to he a man of sound business judement, and having had an extensive experience in real certain business, he is cautious enough to be the prepar time. Mr. C.'s wholesale buying, some five months ago, seemed to the mossback brokers, madness, but to a man possessing such wonderful judgment as Mr. C., it was simply taking advantage of circumstances.

Mr. C. simply came to look over the Sound. He had no sooner arrived in Seattle than he was fully convinced that she had a more hrilliant future before her than any city in the world. Being a man possessed of extraordinary forethought, rare business judgment, and having watched, for the past seven years, Denver, Kansas City, Minneapolis and St. Paul grow, to become large, wealthy, beautiful had flourishing eities, and having an opportunity to purchass some 2000 perce of land lying within a radius of from three to six miles from the postoffice for \$30,000, and seeing at a glance that Scattle had a more brilliant future before her than may of those cities, he displayed his good judgof a life time. Having had the same golden opportunities presented to him before he

This purchase proved to be the best ever reade in Seattle: It was followed by: some factly others. Mr. C. owns and controls some: 16,000 acres, situated in six counties. This includes some twenty-six miles of water front from Olympia on the south to British Columbia on the north, and to-day he is the Sound. Having purchased all this land in large tracts and before the rise in price, he is now in a position to undersell and make hatter terms than mry other person.

was bound not to let this slip.

Mr. C. has the most elegandy full blad cone by his wholesale buying and selling than all brokers have for the six years past. Where men buy as heavily as he did the public at once has confidence not only in the man's integrity, but in his business as well. Every person who has purchased property of him has made from 100 to 1000 per cent.

KOT MADNESS BUT PORSTHOUGHT. Many of Mr. C's, investments were termed by the mosabacks; as madness, but he has conclusively shown the public that he was

simply taking time by the forelock. not only from the first found himself in the midst of a rushing "land office" busileading business men the most successful. solid and brilliant, real estate man in the Northwest. He makes a specialty of handling large estates. There is not another real estate man on the Sound who enjoys the confidence of the public to a greater extent than he does.

"Quick sales, small profits, fair dealing

and perfect titles." Every person, whether he wishes to purchase or simply to obtain information of Seattle or the resources of Paget sound, whether he has a dat bank account on is the most common inhorer, is treated with the same courtesy and respect when visiting his

GREE LAKE.

Nature has done more for this lake than any other lake in the world. The area is about 840 acres. Its depth is 150 feet in the center, yet the banks slope so gradually down from the north that one can wade twenty rods from shore and not be in over five fent of water. The bottom is composed of white sand and fine gravel, making a most delightful place for a public bathing resort. There are some three and a half miles water frontage, two and a half miles of which is owned by us. Every foot of the entire frontage slopes so gently down to the water's edger giounds for yards and lawns in the world. This is the only lake that gets warm enough for bathing purposes anywhere near Seatile.

Green lake is situate one mile due north of Lake Union, and is 160 feet higher. For beauty Lake Union is no comparison to Green lake, and in five years the lake will be the most beautiful spot in the United States. This lake gets its supply of water partly from internal springs and partly from three fine spring brooks, which find their source in ngs situate half a mile porth of the inke. An outlet ten feet wide and two feet deep connects this beautiful sheet of water with Union bay. The lake is well stocked with fine fish, affording plenty of amusement to the disciples of Isane Walton. One of the springs is iron, one soda and

the other sulphur. The water from all has been analyzed by the most noted chemists, and pronounced as fine as any in the world. Our land surrounding this lake not only is very rich and productive, but lies in one grand unbroken stretch for one and a half to two miles buck from the lake, all of which commands a beautiful view of Green Inken. Lake Union, Union bay and Lake Washington and Mount Rainier.

GREEN LAKE,

are destined to grow up in a few years near Senttle, there are none that will show more substantial improvement or be more eagerly sought for than Green Lake. Already extensive improvements have been made and others are to follow in swift succession.

direct line of the Jackson street cable rail-way system of the city of Scattle, and par-ties living at either of the two places can Birteen miles of road have been made in this vicinity during the past winter, and two and a half miles along the lake front reach the city for the same fare and with reach the city for the same tare and warn-equal case as those living on the main land, as degart steamers connected with the cuble railway system will make half-hourly trips have been cleared and are being rapidly beautified. A magnificent hotel, at a cos of \$20,000, and as bath house costing \$8000, are to be erected. The Green Lake Circle and connect with the cars of the cable read, With these means of transportation, this properly will increase in value more rapidly than any other property about Sortius railroad will soon be in operation, with hom the city, and homes will multiply and property increase in value in proportion. A narrow gauge Nickle Plate railroad will also be constructed in a short time, thus making two lines of railway connecting, this beautiless as the needs of the community require

tended and increase the facilities for communication with the largest and leading city

saughlie tyee (Chinook for "the land of God") by Spc-ow, the guardian spirit and Prometheus of the Siwash tribes.

The whites who chanced to be offlicted with The whites who chanced to be afflicted with chronic allments or neute attacks of sickness; found, to their great surprise, that the dusty clandingers surprised them in the art of health great surprise, that the dusty clandingers surprised them in the art of health great surprise, that the use of heirb possessing rare curative properties, wholly anknown to the newsomers. However, they were obliged to obtain these remedies from the natives, as a knowledge of where they could be procured was confined to a limited few called "tamanamus men" ("medicine men,"), who jeniously, withheld their secret from others of their own tribes as well as from the strangers anding on their shorts. So carefully was the ideotity of these herbs concealed that the secret, so far as its perpetuation among the Siwashes was concerned, wascarried to the "skiyou illaho" ("the land of the dead") by its possessors, the now extinct "tamanamus men."

However, the penetrating curiosity and patient research of the white people have at last succeeded in nuraveling many of the mysteries surrounding these defunct Siwash magiciáhs. away from the noise and dust, and contaminating inditences which are always found in large cities. Why pay from \$300 to \$500 a lot on the same line of railway running through Green Lake, when you can buy better and larger lots surrounding this lake for one-Green Lake Circle is bound to be the most beautiful and aristogratic place for cottage homes and stately villas.

homes and stately villas.

Five hundred large lots will be given away to actual settlers. All these lots are high and will be given away. dry and command a most charming view. Fifteen hundred dollars have been spent the past winter making roads and boulevards through this elegant fract. The party owning this has ample means to fulfill any and all promises made. If this lake and surrounding land is not a more beautiful place than represented, the owner will give a tot to

mysicians.

Some twenty years ago a well-to-do logger at Port Ludlow, W. T., by the name of Moore, met with a terrible accident that resulted in his Ecoming a thelpless, invalid, seemingly beyond the reach of medical skill. For over a decade he led a lite of misery and suffering until, in the winter of 1877, he discovered in the sugrounding forcests some of these wonderful medicinal plants, a short acquaintance with which restored him to vigorous health.

Not being a man of a speculative furn, Moore made no attempt to profit financially from his valuable discovery. He contented himself with performing remarkable cures, gratis, among his friands and acquaintances, and sharing his secret with no one. It was not-long before he was dubbed "doctors" and than represented, the owner will give a lot to every applicant.
All this property will increase 100 per cent. n ninety days.

Parties living at Green Lake can get in the city over the Green Lake Circle railroad quicker than over the horse car line from the

ninent among the creditable and grow-

ing industries of Sentile is, the, institution o

the Moore Manufacturing Company, an organization formed for the purpose of extracting the virtues from some of the many.

basin and putting them in a markstable

Fuget sound were impressed with the re-markably healthy condition of the aborig-inees. Although this was thought to be due-

mostly to the sainbrity of the climate, still the natives depended in sidkings upon cortain horse, which they regarded with great

veneration. These plants, they believed, were originally stolen from the "illabe of the

the fame of his vegetable mixture was spread over the entire Peget sound country. No hamlet or logging camp was considered sale against the encreachment of disease unless

names or logging camp was consequences as a spirital the encroachment of disease unless themselves the encroachment of disease unless themselves the advantage of the special companion. With the advent of rationals into the Bonnet manners in his vegetable compound the foundation for un-immense and prespective business venture. After considerable diplomacy and urging Moore was prevailed thou, for a valuable consideration, to share his secret withouters. After considerable diplomacy and urging Moore was prevailed thou, for a valuable consideration, to share his secret withouters. After corporation was formed with Mr. Moore at its head as president; Jenous Distinct of the corporation of Scattle, treasurer, and W. Van Waters of Scattle, treasurer, and W. Van Waters of Scattle, treasurer, and organization adopted the title of the "Moore Manniacturing Company" and gave to the doctor's preparation, the name "Moore's Revealed

aspet on Lake Washington which is superior, to it for; such purposes, while, its nearness and accessibility to the city render it doubly attractive and valuable. The company commenced operations June 1st; 1837: At the start but one man was employed to prepare and put up the Remedy for shipment; the whole work being confined to one small room. The first month's sales amounted to only one hundred bottles. That was a tride over ten months ago. To-day the company descriptions. This 220 acres, with its two miles of water front is being platted into loss, age and five acre tracts, and will be sold on the install-ment plan at from \$30 to \$150 per lot, and for shipment, the whole work being soninois to one small room. The first month's sales amounted to only one hundred bottles. That was a trifle over ten months ago. To-day the company devote one entire two-story building, 28x40, to the manufacturing alons while the labor of labeling, packing, etc., together with office work; is performed elsewhere. Their Remedy has crossed the houndary of local celebrity and now occupiestary months and the sales are promisent place on druggett's shelves theoughout Washington territory. Idabo, Montana, Oregon, California, and scattering localities in the far East. Their sales have increased from 180 bothles is. Jane, 1837, to 300 dozens for the month of March last, and this with culsome agent in this field. The company finds its mail flooded with applications for agencies, but the fear that the dozenst will exceed their present manutacturing capacity, keeps them from spreading over too much new territory.

There is but one explanation of this phenomenal growth, 6.e., the excellency of their vegetable preparation. While in the company's office the writer was shown large files of complimentary letters of the most fluttering character from people who though themselves benefited by a use of this new remedy. Not only are the people enthusiastic in their praise and produce in their thanks but the druggists and even physicians throughout the artire coast seem tecradorso Mr. Moore's "bitters," as many of them term this new Remedy. The druggists say it moets with a most remarkable sale and gives universal satisfaction, while, the doctors terminate the writer. "Every bottle sold becomes a standing advertisement for the Reveated Remedy. We have been for nearly a year now dealing this Puget sound production out to the people and we lave yet to hear of one complaint that the Remedy is not all two present. The from \$75 to \$200 per acra. You can have a lot fer nothing!! Twenty choice lots in Long branch, commanding, fine view, will-begiven away-to-as many parties who will build nice, cottages on them, Asy, parties, designing to avail the massless of this magnification. cent offer to secure a lot should apply at once to C. C. Calkins.

Every lot thus given away is worth \$150 cash, and will be worth three times that amount inside of a year.

As shows in cut (see Musications) to about two miles east of Jackson street callenar line, and is the most sheldered and beautiful bay on Lake Washington: It is one and one eighth miles long and one-half mile wide. The projecting shores of Long Branch and the opposite penjusula completely protect it from all winds and make it a charming and safe resort for pleasure boating and other and safe resort for pleasure boating and other aquatic sports. There is not a day in the whole year that the water in this bay is not calm and perfectly safe for this delightful As shown in illustrations. From the eastern end of Jackson Street statisting, north a distance of statist insites and koulds for twelve miles the observer sees the waters of fake Washington and the undulations of its shore lines in one unbroken vista of beauty, a lake that will suffer nothing by commarison with any other similar beauty.

comparison with any other similar body of water in the world. Just a little south of the year now dealing this Puget sound produc-tion out to the popleand we lave yet lookear of one complaint that the Remedy is not all two represent. The person once giving this vegetable preparation a fair trial is henceforth point of view and one and one-half miles dis-tant lies Mercer island, five miles long and a tour of its surface is a gentle slope from the water's edge to the top of the interior plateau in nearly every place and more especially our agent."
The writer asked the manager, "What are

our agent."

The writer asked the manager, "What are the special fectures of your Remosty?"

It is a Liver Toxic and Bloop Previous. There you have it in a nubshell. Its first and immediate effect is to promote perfect digestion. Then, through, its action on the liver, the various secretions of the body are acted upon in a thorough yet agreeable manner. The character of the blood depends mainly apon, a good, stomach, and healthy, liver. These can be obtained from a short pass of this vegetable compound. It is unnecessary to enumerate the long catalogue of diseases which we are confident can be outed by this remedy, for, by so disling, we would lay ourselves open to the charge of questiery and place our preparation on a level with the thousand-and-one worthless inostrums that are being pained of on a much abused public. The more intelligent people can readily understand how an appetite and tonic that incures perfect digostion and stimulates the liver can become an important factor in the cure of nearly all dispense. portant factor in the cure of nearly all dis

enses."

In glancing over the letters received from physicians the writer noticed that one and all endorsed the Remedy as the "finest parautive they, ever, administered," both, as to its thoroughness and its freedom from any ill or distressing effects. One physician writes:

writes:
"The patient, after taking your remedy,

m or mistressing effects. One physician writes:

"The patient, after taking your remedy, experiences no nausea, griping or feeding of weakness, yet the result is a thorough purging, and the ultimate offects beyond what I ever supposed possible."

Another doctor, of the old school, says:
"I am enaloging it at the early stage of fevera, for I have found, from a three months' use, that it will breakup any feeer inside of ten hours."

On asking the manager regarding the ingredients of this valuable article, he said:
"The Remeily is purely vegetable. The roots and barks from which it is compounded grow only in the vicinity of Paget sound. They are not known to any one outside certain members of our board of directors, although the properties of ours. of the ingredients are to be net with in valuable medicinal plants elsewhere. The knowledge of compounding is also a secret possessed only by the directors above mentaned. On struking peculiarity of the Remedy is that it will not ferment in any climate, although it contains no alcohol, sugar, salecyle neid or giverine. Druggists and chemists have often attempted to produce a like result, but have unifornily met with failures. The Remedy has been sent to skillful chemists in San Francisco, Chicago and New York for analysis by parties an whom to roovers!" I said a syct no one has been able to ever the problem. It caunot be resolved back into its original cicurents any more than "rubber can be devulcanted or stock deerbowred."

"How did the doctor happersupon his discovers!"

"Well, that is a disputed point. You with the

Anyone degirous of obtaining reliable information of Puget sound write C. C. Calkins to the control of the co Moore ascribes his discovery to implication Thousands who have tested the Remedy ar ready to ascorb his statement as true. But there is another classe, disheltering income

things, that promounce, the rinspirational theory a humburg, dithough at the case time endorsing the Remedy. Among this class are many old settlers, who declare that Mr, Moore mingled a great deal with the Indians in an early day and that he obtained the secret from a medicine man in British Columbia, who was grateful to the doctor for having rescued him from drowning at the inaminent peril of toxing his own life. However, the doctor stoutly adheres to his statement, as published in our circulars, that he arrived at his knowledge through supernatural agency. He points as proof to the fact that he is able to produce a non-fermenting compound without the aid of any preservative principle known to science, which he asserts caunot be accomplished by others, although they were in possession of the ingredients. Resides, he says he knows nothing of chemistry, botany or medicine, hence it would have been impossible for him to have made these discoveries unsided.

As for mo I don't care how he became possessed of his information. I am satisfied that this Remedy is one of the wonders of the day, and that the company will, in one year hence, he much le outpressing demund, although we expect to add greatly to our present manufacturing espacity. early navigators and old settlers of.

BEATTLE HARDWARE COMPANY

The above company was organized and ingorporated in March, 1885, and the husiness
forms fooday one of the representative houses
of Seatife and the territory, to every portion
of which, as well as to Alaska and other
paints, it is a shipper of goods. Since the
railroad over the Cascades has been finished
trade with Eastern. Washington has largely
increased. Owing to the peculiar features of
the principal industries of the territory, a
much larger amount of goods or merchandses
which comes under the head of hardware is
used than is the case with most other sections. Mining and lumbering with the manutacturing they naturally engender, the
great anount of slipping done at
the port, all call for a distinct class
of goods, such as saws, belling, tools,
sing chandlery goods, etc., while the agricultural resources of the territory are being rapidly developed, and have assumed such proportions that a vest quantity of agricultural
and farm implements is required to carry on
the work. The impression one receives on
entering the Seattle Hardwarg Company's
establishment is that he is in the wholesale
house of some great manufacturing city, and
so far as possible the company confine that establishment is that he is in the wholesale house of some great manufacturing city, and so far as possible the company confine their basiness to wholesaling. They are agents for the calebrated Bain wagons, Atkins's silver steel saws and Howe scales. Their stook is imported direct from the manufacturers, and they are therefore prepared to offer retail dealers throughout the cointry the best possible terms and prices. The capital stock of the company is \$50,000. They occupy a store and basement 25x100 feet in size, in the main business portion of front street, and have also a warehouse dix80 feet for the storing of agricultural implements, wagons, buggies and other bulky goods. The officers of the company are: M. D. Ballard, president; A. S. Barwell, secretary; and T. L. Cregin, treasurer.

W. H. Johnson, Prop.
Our Saatle number would not be complete without devoting some space to the old landmark; the Saddle Rock restaurant. It is the oldest established restaurant in the city, and it has become proverbial among the pleneers of the Northwest as the most popular resort for city in the delicacies of the season, reved by gentlemanly waiters, and says supplied with the delicacies of the season, reved by gentlemanly waiters. In connection with the main dining room are several small private dining rooms for families. They serve meals at all hours day or night, and give the best 25-eard dinner on the Pacific coast from 12 M. to 7 P. M.

If you don't believe it go and see for yourself, a

SEATTLE LAND TITLES.

While there has been no small amount of controversy with enjoining and counterengioning at Seattle, of late, with reference to the occupancy and improvement of some unimproved tide lands within the city limits, whose present value (it title could be secured) looms away up into the millions, yet so attle is blessed with a set of very good land titles. This is a matter of paramount interest to the investor and lender of money. The titles are based on United States patent, with messe conveyances from the prientees to the present owners.

Settlements at Seattle were unallevery early and the records of many of hips land titles have become very voluntinous. This necessitates the abstracting of fitties by professional searchers. Framinent among these added the have become very voluntinous. This necessitates the abstracting of fitties by professional searchers. Framinent among these added to the firm of Wood of Osborne, earchers and abstractors of land titles, with offices in the Daion blook. Indige Win. D. Wood, of this firm, has practiced law at the Seattle bar for five years, giving special attention to real estate and probate matters, two years of which time he was judge of the probate court of King county.

Mr. Eben S. Osborne, the other member of the firm, has resided in Seattle for over twenty years. He is also us attorney, at law and an expect yearcher of records. This firm has a set of abstract records of the vulse of fitteen thousand dollars, which was prepared chiefly under the supervision of Mr. Osborne, who has built up the extensive abstract business of the firm. This firm also does an extensive business as agents for investors in real estate and, nortages loans. They are well posted in values, dealing the underly introduction of fitty thousand dollars. Their qualifications, facilities and standing cantile them to the liberal patronage they records.

Where is the best place to buy property in Seattle? Estelman, Lleweltyn & Go, will tell you. They are authority on real estate matters, and regarded by all as the leading dealers on the North Pacific coast. When is the best time to buy? My dear six, the best time is at once; the sooner, the more money you save, and the more you will make. One hundred and twenty-sive dollars will now buy abot in Ross addition, but a year because Ross addition is to be the terminus of four great railroads in Seattle. Three of these will be completed by that time. One

BLACESHITH AND WAGONMAKER.

F. Marco, corner South Second and Jack-son streets; Scattle, W. T., is general wagonmaker and blocksmith. He manufactures all kinds of carriages, trucks, wagons, etc., and does all kinds of blacksmithing from shocing a large do welding plows. He has hed many years' experience as his trade, and employs none but the best workmen.

employs none but the best workmen.

The best place on the Pacific coast to plantmoney in is in Rosa addition, lots at the terminas of four great trenscontinental lines of rullroad in Seattle. The Seattle boulevard-passes along this addition. The Ocean cunal passes through this addition. This is the slip cand connecting Seattle happen and Paget found with lake Washington, where the United States government naval station, and ship yards have been selected for location by government afflores. Eschelman, Llewellyn & Co., sell Ross addition lots. Write them or pail at their offices.

STOVES AND TINWAKE.

One of the best places in Seattle to buy stoyes and tinware is at J. Sehran's, Commercial street. He carries a general line of steves, tinware, iron and term cotta pipe, and makes to order copper, tin and sheet-tion into any desired shape. He does all kinds of plumbing, and gives special attentions to tin roofing. Mr. Sehram supplies bolds the wholesale and retail trade. Prices as low as the lowest:

48,687 tons of coal was exported from Seattle during last March. The export trade will increase month by month till September, at which time 100,600 tons will be exported. Several new mines will be opened and coal, bunkers built at Seattle by that time. Oregon depends entirely upon Seattle for her coal. California domir will take the entire coal output of the Seattle mines, if she could get it. Alaska depends on Seattle for coal. Write Eshelman, Liewllyn & Co., for full information.

A. A. Bell; opera houre, buys and sells city property on his own account. Mr. Bell has large property interests in the Bell donation chain, which is the most desirable portion of the townsite of Scattle. Parties desiring to invest can depend upon fair dealing.

Buy a lot in Scattle, and buy from Eshel-man, Llewellyn & Co. They own and con-trol some of the best lots in Scattle. Don't delay. Write- to them for prices and de-scriptive matter. It will pay you.

Wm. Carkeck of the Paget Bound Stone Yard, foot of Mill street, manufactures mar-ble and granile menaments, headstones, etc., and is general dealer in brick, lime and cement.

Awar, Mare you a footbook in Seattle, the future states and the Facility of the Facility. If nat you had state and to Eshelman, Lieweliyn & Company of a lot block or some arresult for want to be right and happy to your alchests.

NORTHWESTERN EXPRESS CO.

Quickest, Safest and Cheapest Medium of Transportation—Hand Offine, Seattle, Washington Territor, Feattle, This company, incorporated April 11, 1887, with a capital stack of \$10,000, now has offices at all accessible points on Paget sound and at Gray's harbor. They issue money orders payable at sight in all the principal cities of the United States, Canada, Great Britain, Franco, Germany, Sweden and Norway and do a general express business. The list of stockholders include such manus as Bailey Gatzort, of the firm of Schwabacher Bros., A. B. Stewart, Geo. B. Adair, of the Gordon Hardware Company, Hon. H. G. Stuve, J. D. Lowman, J. Purthi, eashier of the Paget Sound National bank, J. B. McDongult, manager of the firm of Toklas, Siagerman & Co. and H. G. Davies, names that insure the success of any undertaking. Mr. H. M. Shaw, the general manager, has grown up in the express business, and as a result of his energy and ability the shares of this company, are already away above par. The Northwestern now has messenger service on the Sentile, Lake Shore & Eastern railroad, and a contract is closed for an extension of service over the line by fits company as the road is extended edistward.

The location of the future great city of the Pacific was planted on Elliott bay, with Lake Union on the north and Lake Washington on the east, nearly surrounded by water, like all big cities, and was called Scattle. The 20,000 people now there will grow to 30,000 by next January, and to 40,000 by 1830, and by 1900 to be the mistress of the Pacific. It is the most prosperous city on the coast and the best city in America to make investments in, but the best time is at once, before the great advance. While lots are low in price, \$125 and upwards, is the time to buy, and Fahelman, Llewellyn & Co. not only sell lots in Rosss addition, the best too buy, and Fahelman, Llewellyn & Co. not only sell lots in Rosss addition, the best lots in Seattle for investment or for personal use, where lots now solling for \$125 cach will in one year bring five times this sum, but they own and control more inside and suburban property than any firm on the coast and they are admitted by all to be the leaders in the real estate and money brokerige business of the Pacific. It will pay you to call on them or to write them. And it will pay to do so at once; things are moving in Seattle and you must buy at once.

PUGET SOUND ICE COMPANY.

PUGET SOUND ICE COMPANY.

This company is a Scattle corporation of standing in the financial circles of the city, and as its immo implies, is organized for the manufacture and sale of ice. Their, factory, which is one of the most complete north of San Francisco, is located on the water front adjoining the business portion of Scattle, and their ice being manufactured from the purest vater obtainable is as clear and free from imputities as any ice in the world. This company now has every facility for supplying both the retail and wholesale trade. They can fill outside orders at the shortest possible notice, Their delivery wagons visit all parts of Scattle daily, and their volume of business is steadily increasing.

ing.

"A big sale," "A big offer but refused."
"Another big sale," "A red letter day in the real estate business," "fifty deeds for Beattle real estate blaced on record yesterday," "A company of California capitalists in Seattle to locute," "Another big Portland wholsale house coming to Seattle," is the daily head lines, of the papers in Beattle. And let us say to you, the sooner you have property in Seattle the richer you will be a year hence. When wideawake capitalists are plainting money by the hundreds of thousands of dollags in Seattle, is the time for you to send inoney to Scholman, Liewellyn & Co. to plant for you. plant for you,

The Queen Oity Fewple
when visiting Porland should not forget
that Frank Keller is still on, deck at the old
stand, corner First and Pine, and that the
Boga is still the popular resort for gentlemen.
We know how partial Scattleites are to good
things, and, that they know a good thing
when they see it ordeste it, from a pretty
still, a real estate bargain, goes without saying. This is wby we instarally expect them
get on to Frank's fine Gambriaus beer, delicious drinks (mixed and straight) and visit
the finest equipped, most gergeously freecoed, and codest resort in Portland while
they are here. Our readers need not worry,
however, for Scattleites don't often get left.
Scattle has nineteen wholesale houses dry-

however, for Seattletes don't often get leit.

Seattle has nineteen wholesale houses, drygoods, groceries, woodenware, hardware and liquons, and more are coming. A cable car road five miles long is half finished; will be completed by Seplember next. Four miles of street our lines are now in operation and five miles more in process to use motor power. Three broad and two narrow-gauge railroads are unable to do the land transportation business, while 128 steam and saibboats ply to and from Seattle harbor, their headquarters on the Sound, to all parts of the world. Don't delay to secure a lot from Eschelman, Liewellyn & Co. They will select it if you send the money.

A PROMINENT REAL ESTATE FIRM.

The firm of H. H. Dearborn & Co., who are large property- owners in Seattle, are engaged in buying and selling real estate and negotiating first mortgage leans. They have been interested in Seattle and Puget. sound sharing to the large from Lowell, Mass., where they were engaged in banking business for titteen years. They are thoroughly, reliable and enterprising. Their ist includes some of the best business and residence property in Seattle.

Efficen hundred houses will be erected in Scattle in 1888. Over 500 are now going up. Scattle has eight sawnils but is forced to import tumber; eight bricky ards but imports brick. Buy a tot in Scattle from Eshelman, Ilevellyn & Co., where San Franckeo, Portland, Minneapolis, St. Paul, Chicago, Boston, and New York capt lailsts are planting money by the hundreds of thousands of dollars in Scattle, soil, it fooks as if they also had confidence in the future of Scattle. Send to Eshelman, Llewellyn & Co., for printed matter telling all about Scattle.

There is no plane like home, and there is no place like Scattle to have that home in, because it is in the best climate in America-perpetual spring; flowers bloom overy month in the year; grass, always green; no bigzards, no cyclones, no drooths, no grasshoppers to disturb your peace of mind, damage your crops and property, and make life miserable. Secure a home in Seattle with there is a chance; don't delay, but call on or write to the real entate and money brokers of the North Prenise—Eshelman. Liewellyn & Co. It will pay you. It will pay you.

Samuel Kenney, Commercial street, Seat-tle, W. T., is general merchant tailor and clothier. He deals in gents furnishing goods, hoslery, gloves, and French. English, Scotch and American goods. Konney, by square dealing and by a constant effort to avail himself of every opportunity to pur-chase the hest grades of cloth, has built up a large trade in Seattle, both with the nabols of the city and with those of more moderate means.

means.

Eshelman, Liewellyn & Co., have the best additions in Seattle for sale, judging by the way the lots are picked up, sixty to eight per day, mostly sold to homescekers. Look out for your home now in the future great city. Buy a lot. The real estate transfers for March was \$66.875 for Seattle city property alone, a shown by the register's office, what will it be by 1880. Buy now and get the advance. Eshebuan, Liewellyn & Co. will show you where to buy. теаря,

show you where to buy.

Kline & Rosenborg of the Star Clothing Heuse, 286 Commercial street, Scattle, W. T., carry the heaviest stock of clothing in the city. Established six, years ago, this firm now enjoys the best trade in Scattle. During the busy scason they carry between \$50,000 and \$75,000 in stock. Kline & Rosenborg make, a specialty, of fine clothing and gents furnishing goods. They guarantee satisfaction.

Soda Works,
Georga T. McGinnis & Co., Seattin, W. T.,
are general manufacturers of soda water
syrups, root heer, etc., and are agents for
Eastern cider, Swan ale and porter. This is
the oldest house in the city. Their stock
is at all times full and complete. Special
attention given to autiside orders.

Look at your deeds, my friend, and see if they read for lots in Seattle; if so you are all rolled; if not don't lose any time togets deed for Sentite, lots, if you want to be comfortable and happy in your, old age. Eshelman, Liewellyn. & Co. will sall you these lots. They are the real estate and money, brokers of the North Pacific.

DENTIFIER A Bastern prices.
All work warranted for twelve months:
In ALBERT-J. FORBEST, dentific,
the Deposit building, Senttle, W. T.

Mr. D. T. Denny, the senior member of this firm, has been identified with the history of Scattle from the first day of its existence, having arrived on Editott bey in September, 1831. It took up a donation claim in what is now the best residence part of Scattle, a spot overlooking Paget sound. It is gently rolling and-drops back into the suburbs of the city, forming at that time a fine site for a pioneer farm. To-tay Mr. Denny's donation furm is dotted with the house of several thousand people, and there is still room for thousands more. The firm is now offering several hundred lots of their own property in North Scattle and additions thereto, which is one of the finest steps for residence building in the city. It is very popular with the public and is being taken very rapidly. The firm deal to a greatextent in inside property, but they have a choice lot of farm, coal and timber land for sale. They have a wide experience in Scattle business affairs and srenoted for and near for housesty and fair dealing. John B. Denny, the junior member of the firm, has grown from childhood with the city and is a young man of enterprise and full of business. The firm has a fine spite of offices in the Opera-house block, on Front street.

Another new bank is opening in Seattle, with a cavital of \$400000 making six to all.

Front street.

Another new bank is opening in Sentite, with a capital of \$400,000, making six in all. The owners of this latest bank will build the finest banking house on the coast in Seattle. Two large new bick school buildings are in process of crection. Two now church buildings are going up. Five hundred and naty resident houses are under way of construction now, and 1000 nore will be completed by the end of the year. Twenty-six large business blocks are now under construction, some of them the finest structures north of Ban Francisco. Now is the year to secure your lots in Seattle; next year they will cust double the present prices. Call on or write Eshelman, Liewellyn & Co. A. B. STEWART & CO.,

Live and Prosperous Sentile Firm With a "Live" (With a Big "L") and Pros-perous (With a Bigger "P") Man at the Bead of It.

perous (With a Bigger "P")

Man at the Head of It.

The firm of A. B. Stewart & Co., wholesale and retail dealers in drug, patent medicines, dental and photographic supplies, is one of the heavy houses of the city, established in 1882, this firm now carries a thirty thousand dollar stock and their trade reaches to all parts of the Paget Sound district. Their store in the heart of the city is elegantly appointed—and they carry a complete stock of everything pertaining to their line. Mr. A. B. Stewart, the senior member of the firm, is a young gentleman, thoroughly identified with the interests of Seattle, and is interested in many of the financial institutions of the city, being president of the Seattle Hotel. Company, with a capital stock of 59,000, lessess and managers of the famous Occidental hotel; is a stockholder in the Paget Sound National bank, the Hone Insurance Company (with, a capital stock of \$50,000) and also in the Northwestern Express Company.

Stranger, you are right, this is the time, to

also in the Northwestern Express Company.

Stranger, you are right, this is the time to buy lots in Seattle, one year hence they will cost double the present prices and don't you forget it, and the firm to buy of is that of Sesneirann, Idevelen & Co., who are leaders in the business. They have been here for year, speat thousands of dollars in advertising Seattle and the county, own a vast amount of property; and are not only the heaviest rollers, but the heaviest huyers. They have confidence in the great future of Seattle. They are liberal, fair, hoporable dealers, responsible, and deserving of their great success.

Our illustrations of Seattle.

The engravings accompanying this special edition will give a stranger an excellent idea of the thriving, enterprising and growing city of Seattle, W. T. The sketches from which the engravings were made were prepared by The R. Ornownan's corps of artists and were engraved by the leading engraving house of New York. Thus, by a liberal expenditure of money, we have heen able to produce something for the Queen City, of the Sound for superior to anything heretofore published. The finishing dones to these inte views, however, was given by A. Anderson & Co., of this city, into whose hands we entrusted the presswork of the engrayings. The fine, artistic printing of this firm is well known through the Northwest, and it needs no praise in those columns to establish that fact, yet we desire to make our acknowledgements to the firm in return for this particular piece of excellent presswork.

Saattle's railroad ora is just beginning to

Seattle's refired eracellent presswork.

Seattle's refired are is just beginning to dawn. If Seattle's streets, are crowded like the Broadway of New York now, and thousands of dollars' worth of property changing hands every day, what will be the state of affairs one year hence, when the Canadlan Pacific, Southern Pacific, Union Pacific, Northern Pacific, Manitoba and the Seattle, Lake Shore & Eastern railroads are completed. Verily, the fortunate possessors of lots in Seattle will have a harvest. Now is the time to lay in a stock of property for next year's trade. Eshelman, Liewellyn & Co. have the property for sale and will select your lot.

HARE OPPORTUNITIES.

Kare oppositionaries.

King county, Washington Territory, with its wonderful natural recentres of coals, orce and forests; with its there, lakes and sea; beautiful scenery, verdant hills, luxuriant vales and delightful climate. Hoding within its charming and healthful environment, a city of such size, commercial importance and heauty as Scattle, queen of the Northwest, afforts a field for investment, for rich and poor, unequaled in the world. Persons withing to invest can purchase anything, from a desirable luminess lot, elegant suburuan lots, five, ten, twenty or forty-acre tracts, to an improved dairy farm, with its fertile meadows, shedy lanes and gushing springs, by applying to 2. H. Bowman & Co., 1994 From street, or postofice box 186, Seattle, W. T.

And still they come, day by day, business

Seattle, W. T.

And still they come, day by day, business houses from Sun Francisco, Portland, Minneapolis, St. Paul, Chicago and Kansas City. They all segm to think that Escattle is to be the future great city of the Pacific. After being here as while, they all know that Escattle is to be the New York of the Pacific. So will any business man when he looks at the location on the best harboy on the const, backed by the greatest recources of earth, road, from thaber, and ugriculture, with ship building, manufacturing one fisheries thrown in, to say unthing of controlling the commerce of the North Pacific, while there is a chance to secure a footbold in Seattle from Estelman, Llowellyn & Co.

Esterman. Lievallyn & Co.

Lateur & Co., Opera Block.

This firm carries a complete lime of foncy dry goods and ladies' furnishing goods. Their stock consists of all kipds of worsted, exphyrs, yarms, embroidery and fancy work materials; gloves, hostery, nguslin and knitted underwars, tron-seau, infants' outlits, corsets, laces, embroideries, trimmings, etc. The only first-class stock in that line north of San Francisco. The house has gained a wide reputation for their fair, square dealings, and to keep the best goods at the very lowest prices.

[N. B.—Strictly one price.]

Bear in mind that Scattle is the set of the control of t

Bear in mind that Seattle is the capital of King county, Washington territory—the richest 2000 miles of area in natural resources on the earth, iron, coal, timber, agriculture and facilities for manufacturing. Where the coal and iron or abound there the manufacturing must congregate, and where manufacturing is done there is the wealth. Where wealth abounds there is the home of science, arts, culture, outerwise making science, arts, culture, cuterprise, public spirit, liberality, contentment and happiness, Washington is the Pennsylvania of the Papitic. Sensite the Pittsburg and the New York of the Papitic. Secure a foothold in Beatth from Eshelman, Liewilyn & Co.

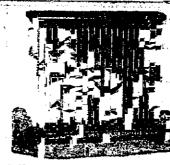

Scattle from Esbelman, Liewilyn & Co.

Immediately around Scattle are 200,000
nores of the richest valley lands on the globe
for grain, hay, hops, fruits and regetables,
and especially adapted for growing the nugarbects. The best sugar industry will rapidly
develop and great sugar factories will be inoperation in Scattle. In Scattle, by the side
of these great bectungar factories, will be immense florming mills, to grind the bulk of
the 60,000,000-bushel crop of the Inland Empire, for export to China, Japan and the
islands, of the Pacific. Millions of dollars
will be invested in factories and mills in Scattle. Becure a foothold in Scattle, now, from

AN UNPRECEDENTED SHOWING

Bartland, During the Year 1987 Foots Up Rearly \$109,000,000, Exclusive of Real Estate Transactions -- As a Piace for Safe, Rapid and Remanerative Investment. Portland is Sort passed by No City in the United States.

PRICE OF PROPERTY.

Improved business property on the principal business streets, paying from 8 to 12 per cent. on the investment, can be had from \$500 to \$1500 per front foot. Choice residence property within a radius of twelve blocks from the postofilee can be had from \$2500 to \$5000 per for. Uniform size of lots. 50x100 feet. The city of Portiand is bounded on the east by the Wilkamette river (\(\mu\) miles in width), and on the west by a continuous chain of rolling hills (one and a half miles distant), with a gentle slope towards the river. The extreme north and south length of the city proper is four miles. The growing direction is south along the west bank of the river. Property in this direction is made accessible to the business center by handsomely furnished stramboats, and standard and narrow gauge railroads, trains leaving every fifteen ninutes and carrying passengers a distance of three miles for five cents. Acre tracts can be find within a rapassengers a distance of three miles for five cents. Acre tracts can be had within a ra-dius of three miles of the postoffice, on either side of the river, for prices ranging from \$100 to \$600 per acre. Choice subarban lots on the line of established motor lines can be had from \$100 to \$500. The tite to all land bandled by as is guaranteed to be abso-utely perfect. The usual cash payment on property is from 20 to 50 per cont. Legal rate of inherest, 10 per cent; ruling rate, 8 per cent. Taxes in city, 2 per cent, on a 68 per cent. Valuation.

TIMBER LAND

(Fir), for milling purposes, cutting from 80,000 to 100,000 feet per acre, is worth from \$5 to \$20 per acre, owing to its convenience to water or mil. FARMING LAND

(Improved), in the finest improved valleye in the world, convenient to river and rail, schools, churches; etc., can be had from \$10 to \$30 per acre. Unimproved in same locality, \$5 to \$16. Choice

FRUIT LAND

Adapted to the growth and culture of grapes, peaches, plums, praces, apples, pears, cherries, strawberries, almonds, sweet potatoes, etc., can be had in Southern Oregon, within five miles of the Oregon & California railaroad, in large or small tracts, from \$10 to \$25 per core.

GRAZING LANDS,

Where little or no feeding in winter is necessary, can be had from \$1 to \$3 per acre. A restdence of twenty-five years in the city of Portland enables us to speak authentically of its past and intelligently of its future. Maps and views of Portland, as well as all general information about the state of Ore-gon, will be furnished or forwarded to any address free of charge.

One Man Not Afraid to Speak His Convictions

I G Warner Tells the People of His Own Home that Portland Will Be the Kaneas City of the Pacific Coast

When it comes to thinking and talking of Port land's future grawth there is not a more enthusi-estic man in this c ty than J. G. Warn r. Pifteen years ago he lived in Kansas City and lost his op-

a couple-deck steel bridge is now being constructed over the Willamete river under the supervision of Mr. George S. Morrison, who was assistant engineer under Octave Chanute when the Hannibal bridge was built in Kanasa City, twenty years ago. The cost of this bridge will be about \$500,000. A new hatel will be built this summer as a cost of \$750,000, all of which is subscribed by Portland business non, and \$150,000 has been subscribed for an incitatrial fair building, which will be opened next fall. There has been \$50,000 subscribed for actertising and \$2500 as being paid out of that fund regularly every month. Next year the amount will wast-year the amount will wast-year the amount will wast-year. "It is all true every word of it," said Mr War-

Several days ago a young woman, without experience came to Portland on one of the trains she had nover been here before and really did not know and could not tell where she wanted to go The hack driver got from her the name Fulton, and took her across the river thinking she wanted, perhaps, to go to Fulton when the driver got over to Forthand he hocked into the directory and footnets name of Eider Fulton, East Portland footnets of the driver of Fulton he may be a fiver to Fulton he more than the footnets of the property over to fortland he looked into the directory and found the name of Elder Fulion. East Portland 30 instead of taking her up the river to Fulion he brought her back to the East Portland side and finally out to Mr Fulion a residence. The driver, Frank Andrews, charged the young woman to, which was regarded by her friends as extortion ate and yesterday Andrews was arraigned before Recorder Liewellyn. On the witness stand the young woman was unable to tell anything about the matter could not tell whether sho had been taken across the river, and in fact could not tell where the driver did take her However, the recorder was of the opinion the charge was too high in any event. He fined Andrews 55, which he paid. The young lady seemed under the impression the recorder could could compel the driver; to restore part of

The company is now negotiating for more muchinery and will soon be ready to runnight and day, with a daily capacity of tentons. They compay quarters on the water front, convenient to shipping and will soon be one of the most important manufactories on Puget sound. on Pugel sound.

Thirty-five years ago a man: took up a claim from the government of eighty acres. Yesterday he was offered \$60,000 for 60x120 feet of this claim. Did it pay him to select this claim and live on oysters, clams and game until he could put up a sawmill? Just as good lots a little further back cannow be bought for a new hundred dollars. What will they be worth ten years hence? A fortune to the tucky possessor. A year ago a man bought a lot on Second street for \$15.000, has recently refused \$30,000, preferring to build a brick block and live on the rents. You can get rich if you will now buy a lot from Eshelmen, Llewellyn & Co. if P amith, Barannah Mo U N Strow, Jik wood A Nickoen wt, Lincoln G Hager of St. Germany A N Westergant, do H G Baordh, do H G Baordh, do H G Baordh, do D Lampman, O & C. ST. PETERSBURG NOTES.

A Ballway to the Caspion-The "Gazette"

BEATTLE UPHOLSTERING, SUPPLY AND MANUFACTURING CO.

The Seattle Headquarters.

Owing to the demands of the increasing tride of the Poget sound district, the leading agricultural implement house of the Northwest, Knapp, Burrell & Co. of Portland, Oregon, have established a house at Seattle which will hereafter be the distributing center for their entire Puget sound trade. Mr. Albert Witton, a gentleman well qualified for the position, has charge of the Puget sound circuit. It is by this change that the sub-agencies at Olympia, Tacoma, Port-Townsond, Whatcom, La Connor and Schome can purchase goods as cheap from the Seattle house as they can by dealing with Portland direct. This means to the purchaser just the saving of the freight between Portland and Seattle Knaup, Burnell & Company is incorporated with a capital stock of \$220,000, and now has branch houses in all important trade centers of the Northwest. Their Seattle house is the most important branch in the territory, they keeping constantly in stock at this distributing center about \$60,000. This is now one of the most important houses in Seattle, and this more of one of the largest and best established houses in the Northwest, may be accepted as a sure indication of the importance of Seattle as a trade center.

If you want to see business call at Eshelman, Lievellyn & Co's, offices, the proprietors, clerks, and a dezen for showers, all busy. Carriages arriving and departing from their offices filled with investors viewing the city, and their properties.

Six wholesale houses of Portland have opened branches in Seattle in the last thirty days. They see where the great city of the Pacific will be and they are securing a foothold. Call on or write E-helman, Liewellyn & Co. for full printed matter.

Sentile has twenty-three churches and twelve schools, a territorial university and four colleges, the United States land office, the United States and distributing office, and headquarters for the courts and all government business. California alone will take the entire present

Canorima acres with sign the entire present out-put of coal shipped from Seattle. Oregon also looks to Seattle for supplies. Alaska calls also for her supply. Send to Eshelman, Llewellyn & Co. for printed statistics and facts about Seattle.

Sentile has nineteen wholesale hosues, in the dry goods, groceries, wooden ware, hard-ware, clothing, drugs and liquor trade, 'Moro are being; added every day, Send to Eshelmen, Lieweilyn & Oo, for full descrip-tive mutter. tive mutter.

tive matter.

For printed matter giving full details of the great nity of the Pacific, Seattle, and its unrivuled resources to back it, call on or write to Babelmon, Liewellyn & Go., they have tone upon tons of printed matter,

Eshelman, Llewslyn & Co, made the largest sale, on April 7, ever made in the territory-viz. 150 acres in. West Stattle, at \$1000 per acre, \$150,000, to a syndicate of capitalists from San Francisco. The cars of five railroads now run into Se-gulis. In two years like cars of sen lines with enter Seattle. Scattle is the future great city, of the Pacific. Write to Eshelman, Liewellyn & Co. for incts about Seattle.

San Francisco capitalists are getting a big touthold in Benetic, and, they not only buy that that a safety business business and acti-ries. Exheman, Liewlyn & Co. can send printed matter telling all about them.

THE NEW PROGRAMME.

The St. Louis Ticket to be Cleveland and Thorness.

Sr. Permapuea, May 23.—The city of Sarmarcand is the scene of great rejoicing over the opening of the new rullway to the University of the first train, upon which were General Anneahoff and a notable company. The formal opening will take place on the anniversary of the coronation of Alexander III.

The Moscow Gazets, commenting on the recent scarce over the condition of England's addences, asys: "England, being a ruin, nust be content to play the part of a peaceful commercial state."

The Nove Vretwy asys that the commission which has been occupied five years in revising the laws affecting the Jews in Russian, is about to conclude its labors without acriving at a definite result.

The sex Lévis Tickes to be Cleveland and Thorison.

PallameLphia, May 28.—The Twest to day says: The democrate ticket to be placed in command to a the Bt Louis coveration will norman a first the first train, upon which were General Anneahoff and norman and the Bt Louis coveration will norman a says: The democrate with the full knowledge and approbation der lit.

The Moscow Gazets, commenting on the recent scarce over the condition of England's defences, asys: "England, being a ruin, nursi be content to play the part of a peaceful commercial state."

The Nove Vretury asys that the commission which has been occupied five years in revising the laws affecting the Jews in Russian, is about to conclude its labors without acriving at a definite result.

The sammiles recent the pown and down from the president, the second of rice-president, and the president in the recent shading the president of the part of the president of the part of the president of the president of the part of the president of the part of the president of the part of the president of the president of the part of the president of the president of the part of the president of the president of the part of the president of t at a definite result.

The sawmills, planing mills, sash and door factories of Seatife run day and night, and they, are weeks behind their orders. Buildings are delayed for want of lumber, and large quantities are brought in from other towns. Seven brick yards are running in Seattle, but buildings are delayed for want of brick. Several cargoes have been imported from British Columbia and down. Sound towns, and still the cry is more brick to build business blocks in the future great city of the Pacific-Seattle. Secure a foothold now from Eshelman, Liewellyn & Co., the real estate and money brokers.

WAR IN VIRGINIA.

Corporation's Engineers Rouled with A Corporation's Engineers Routed with Shaughter.

ARINGDON, VA., May 28.—Engineers of the Tonnessee Steel and Iron Company, while surveying in Wise countly on the 23th, were attacked by a body of men in ambush and two of the party were killed. A company of guards employed to protect the engineers were driven off and routed. Great trouble is expected and settlers of the neighborhood warn engineers to leave immediately. The cause of the trouble is a dispute over the possession of land which both settlers and the company claim.

AND MANUFACTURING CO.

This company was incorporated April 4 of the present year (with a capital stock of \$24.000) for the manufacture and sale of fine excelsion. This is one of the most promising manufacturing enterprises of the "Queen City." For years the trade of Washington territory has been supplied with excelsior from Chicago, of an inferior quality to that now made in Seattle—the Eastern article being perticularly coarse and full of dirt, chips, etc. The freight on excelsior alone from Chicago to Seattle is \$20 a ton, and it was, to remedy the old order of things that the present company was organized. This company now owns timbered land on the Skigit river on which stands sufficient cottonwood thuber to supply them for five years honce, and here they are erecting a large dryhouse to dry all the timber on their own land. They are now turning out the finest grade of excelsior manufactured, in the world, and can undersell any of the Eastern manufacturers. They can fill orders for all parts of the coast. They will soon put in machinery, in connection with their present plant, for manufacturing all kinds of upholstery; supplies, and will use none but the best materials. The company is officered by the following gentlemen:

Capt. W. D. O'Teole, president. seesand in India which does seekers and the company claim.

"I newer saw such crowds of people in a town the size of Seattle; it beats a circus day East," were the remarks of an Ohio man in the Queen city last week on seeing the crowds going to Eshelman, Llewellyn & Co.'s offices.

FULLER'S NOMINATION.

It Still Hangs Fire Enforce the Senate Judiciary Committee.

Washington, May 28.—The senate committee on judiciary this morning again considered the nomination of Fuller, but did not reach a conclusion. It was decided to hold a special meeting on the case next Tuesday, at which it is expected the matter will be disposed of.

hold a special meeting on the case next Tues-day, at which it is expected the matter will be disposed of.

Eshelman, Llewellyn & Go, have never halted in their advertising Seattle from the very first, and have sent and are sending out tone upon tone of printed descriptive matter each year.

It was the ledy who thought she was going to swoon who had a faint suspicion.—Little (Penn.) Express.

TO BUILD TO COUR D'ALENE.

Every Indication that the O. R. & H. Will Commence at Once.

ome Pacts and Some Conjectures About the ien Railway Company Lacently Incorporated.

e incorporation of the Oregon Railway Ex-ten Company, briefly reported Sunday morn-means independent railway connection be: in Fortland and the Control Alcon mines, and land and Spokane Falls. White the principles not say that in so many words, the ning in view of all the electromataness canmeaning in view of all the circumstances cannot be anything else. There is the best of reasons for believing it is a direct invasion of Northern Pacific territory by the Oregon Raffway & Navigation Company. In the first place, all the incorporators, viz., H. W. Corbett, C. H. Lewis, Honry Falling and W. H. Holcomb are directors of the O. R. & N. Co., and the lines which the new company propose to build connect with existing lines of the O. R. & N. The object of the incorporation, as set forth in the articles, is to build and operate railway lines as follows:

Alto via Estre to Wallula, and from Estea paria.

Texas Forry via Picasant Valley to Dutch
the 85d mile post on the Palouse branch of
the 8.4 k.); therea easterly to a junction with
ashington & Lotho road at a point five miles

"How about the Eastern Washington lines?"

Here is the "circumstantial evidence" going to Here is the "circumstantial evidence" going to establish the theory that this far movement by the O. R. & N. Co., to intild into the Count d'Alene mines and Spoisane Falls. The interporation of the Oregon Extension Railway Company was not done for fun, and the building of the link to-onnext Riparia with the Falones branch of the O. R. & N. frees the latter from the Northern Pacific—astep which Portland has always insisted that the O. H. & N. Co. abould take.

N. Co. should take, by the may not be generally known that the group & fight railroad is controlled by Eli-th, president of the O. B. & N. Co. The mines. So the relations between the new involvement property and ideho road may be considered as very close. But what gives emphasis to the conjecture that the O. R. & N. Intend to reach out for Command the Washington and Idaho is the fact that the bill giving the Washington and Idaho is the fact that the bill giving the Washington and Idaho is the fact that the bill giving the Washington and Idaho Company the right to build a subsould thought the Count of the property of the country of the count

tion, maned both houses of congress and it estood that President Cleveland will offer reservation has always been a stambling block. It is well known that aureyons have been in the field for two months, and rights of way have been secured for a great part of the line. From what is known, and what can be reasonably in ferred, it will be no surprise to hear that building

THE HATCH BILL.

Providing for Experiment Stations for States

Readers of This OREGONIAN are no doubt much interested in the co-called fluten bill, passed in March, 1887, to provide at least one agricultural experiment station in every state and territory. This bill caused great interest among the people are in procressive agriprinciples as a school of agriculture. The people who are interested in the success of this institu-tion will strongly endorse the view taken above.

A SAMPLE INQUIRY.

A Colony from Kebraska Scaking Refuge in Oregon from Climatic Severity.

The number of letters received by the board of
immigration is constantly increasing. A reporter
who called at the rooms of the board yesterday
from Becretary Strube with his table piled up
with communications from meanly every state in
the Union, but more from Kansas and Nobraska
than from any others. The following from Mr.
A. B. Arbuckle, editor and proprietor of the Harlan county Trace, Neb., is a sampler
ALMA, Neb., May 25, 1888.

For the benefit of quite a number of our best
citrens who would like to make their homes in
oregon, will you kindly forward me such descriptive and illustrated matter pertaining to the citmate, soil, healthfulness and other features of

outsards, cyclones, wind storms, thunder storms, drouths, and kindred evib. I feel quite certain that if the outlook is encouraging, and freedom from these drawbacks is assured us there, a very respectable colony, not only in numbers, but in character as well, can easily be formed here to locate at some point in Oregon.

SAWWILL STATISTICS. Some Figures About the Lumber Capacity of

The Tacoms Ledger keeps as standing n its commercial page the following table "Sawmill in Three Cities:"

North Pacific Lumber Co. G. W. Weldler Tacoma Mill Co

The attention of The Oneconian was called to

Whether the figures for Scattle be correct or not. THE OREGONIAN lias no means of knowing, but the setual deliy capacity of the mills of Portland and Tacoma is as follows:

LATEST PROM COUR D'ALRES. Mayor DeLashmati Reports Everything Pros-

Mayor Delashmutt returned yesterday morning Mayor DeLaminit returned yesterday morning from one of his semi-occasional visits to his min-ing properties in Cour d'Alene. He reports excrything propering and everything going shoad, and many new mines being opened. A rich body of one was struck in the Richmond a rich holy of one was atruck in the Richmond a few days since, and the gold mines two and a half few days since, and the gold mines two and a half fulles from Warcher are prospecting well. The company, Mesers, Warcher, Goldsmith and dithers, Moore and are going to more it down and will have it running in misely days.

The filters he was a turning on about twenty—it has filters he was a turning on about twenty—it has filters he was a turning on a down twenty—it has filters he was a turning of the filters he was a first single and the filters he was a first single and the filters have been supported by the filters and the filters have been and the point, about three miles above Wallace, and a transway is being hill 7500 feet long, which will be on operation by the 1st of October.

Mr. DeLashmutt bought the spacey of the bank of Martay, which will be called the Miners Exchange hank. The bank of Wardner has closed, which is aves the Miners Exchange the only bank in that section. He came back by way of Elemburg and signed the currency for the National bank there—signed his name 250 times in the attentom and evening—and arrived home on the only week-bound teath passing through the Stam-

PLEASED WITH THE CLIMATE. A Visitor from Himois Who Makes Invidious

city and is very favorably impressed with what he has seen of Oregon. He said to a reporter yesterday;

"I have been considerably since leaving home, and the most beautiful climate I found is right force and the most beautiful climate I found is right force and one city. I have been all through southern California, topping a while at los Augeles, San Bernardino and san Diego, but none of these places have impressed me so favorably as Portland. Los Augeles, in particular, looks very well upon the surface, int let a man of an inquiring turn of mind remain there two weeks and he will find that the place is very hedry off in a financial way. One of the great climatic drawbacks, and a very deletorious one is the variation of temperature between the night and the day. That certainly is very injurious. That certainly is very injurious. That certainly is very injurious, the house of the had no idea, such, in fact, very few have, of the had no idea, such, in fact, very few have, of the land no idea, such in fact, very few have, that within a year or two more with lowever, that within a year or two more with a known of the great influencements offered Essience of men of the great influencements offered Essience of the laces in Oregon, which is bound to be surprised to find me a permanent resident of Yorland within a year."

King county bes veritable mountains of iron ore of the best quality hematite for making. Research steel at the original smelting. All of this enormous wealth is within forty miles of Beattle, our her Scattle, Lake Shore & Bastern railroad. These iron veins as well as the road are controlled and largely owned by Scattle citizens. Seattle will reup the benefits of both. On her water front will be miles of factories and milis. On her harbor will float the fleets of all nations. Into the pockets of Seattle's business men will pour a golden stream of wealth, and all property-owners will become the Astorsof the Pacific. For full particulars, apply to Eshetman, Liewellyn & Co.

Boys wanted at the American District. Boys wanted at the American District, First and Morrison.

HELLO THERE.

Improvements made in Portland's Telephone Service.

A Switchboard That is Found Only in a Pew its Working.

Hello: Hello: What is it. All them. Stone a messenger to—Louder, please. Ro—Is busy. No-wants senesenger.

That is I hat an Orngonian reporter heard when hes tered the new operating room of the Porthald Telephone Company ou the second floor of the building on Second and A streets yesterday atternoom. Generally it was a male voice that hurled these expressions through the transmitter, but occasionally the melodious tones of the young lady operators were called into requisition. Once in awhile the monotony was varied by an operator taking occasion to remind some subscriber who had not read the new rules that it was not necessary after ringing three bells to wait for his bell to ring in a response and that the proper thing to do was to put the instrument to his car immediately after ringing up central, Each subscriber thus admonished noments some new outcomes and the same old story over ngain. If yesterday's work was any criterion of life in a central office it would seem that the qualifications are nonester are a cargo of patience, "a throat

irregular, spasmodic way in which calls come insometimes there will be a full of several minutes
between calls and thou again thirty or forty will
be received in half a minute. We could not
under any circumstances get operacors county
around the board to answer all these in time to
suit each authoriter who probabilities he has
around the board to answer all these in time to
suit each authoriter who probabilities to the appearance of the minute has been appearanced to the seven each call as speedily as possible. Business men
who are frequently overworwded with orders understand the logic of this.

While Mr. Thatcher was speaking business relaxed for a minute and the drop of the countriator was the exception, not the rule. The operators who, for quite a period had not a respite
sufficiently long to take a breath, not ospeak, had
removed their ear-phones and were reclining at
ease in their chairs. But it was for
only a moment. First one enunciator foland within half a minute thirty aine more joined
it. There the six operators were kept just as bosy
accompanied with the cilct of instruments, such
as to not besend in the courted offices of selections.

is to turn in a call from a district bor, the number of which is shown on the register in the countral office. The number of the subscriber calling can be read by the operator while the register is running, and without consulting the "tape."

In order to give some idea of the intriente nature of the sufficiency of the intrient of the sufficiency of the intrient of the sufficiency of the sufficiency of the intrient of the sufficiency of the suffic

off the full open the line, and ronder the wire struck unserviceable for the time being. The replacing of the gold foil would be all that is necessary to place the line in condition again. This is a great improvement on the old syngem under which infinite damage raight result from a stroke of light-dring. In Oregon there is no fear of light-nine, but in the Pear where there is a great deal daing. In Oregon there is no sent a deal but in the East where there is a great deal but in the East where there is a great deal but in the East where there is a great deal at of damage, here, in 1824," said Mr. here fafter he had shown the reporter every-these four 200 teles.

"When I took charge here, in 1884," said Mr.
Thatcher, after he had shown the reporter everything to be seen, "there were less than 200 telephones in use. Now there are 560, or thereabouts, of which 500 are in Portland and about four on the east side. This grulfying increase of over 300 shows that the telephone is popular. Finally our old switchboard on the first floor became too small for our business and the line provenent i have just shown you became acressery. Desiring to give its customers the best service possible the company spent \$10.00 in increasery. Desiring to give its customers the best service possible the company spent \$10.00 in increasery. The latest and most improved save not fellow cities which has this style of a citiebboard. Providence, i.e. I., Brooklyn, N. Y., is getting one. We now employ six operators in the day and three at night and 20 messengers."

What is the population of Seattle? Yes, sir, fully 22,000. What was it January, 1887? About 13,000, the year inforce 9690, and it 1889, 3633. What will it be by 1889? Yes, sir, fully 30,000, and by 1890 it will reach 40,000. Do you think so? Why, there is not a bit of doubt. Seattle has more natural resources and possesser greater natural advantages for controlling these resources than any other city in America, where iron, coal, timber and agriculture are all combined on a given area. There is sure to be great wealth follow their development, which will

or in manufacturing and other enterprises, Albina presents to-day the most absolute assurance of the largest increase on such investments of any spot in Oregon. It is beautifully situated on the river opposite the north end of Portland, and DOWN the river from the central portion of Portland. The bridges already built, under construction and contemplated, are fast driving the heavy business of the city and nearly all of the shipping further and further down stream. Soon all of it will be carried on below the railway and passenger bridge. Albina will get the benefit of this move, and even now she has the
